publication; see page vi for more
information.

CHANGEMENTS IMPORTANTS en
ce qui a trait aux données de cette
publication; pour de plus amples
informations, voir à la page vi.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 992-5613) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(949-4020)

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
 - nil or zero.
 - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

1. In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
 - néant ou zéro.
 - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTES

1. On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates(1) — January 1983 (Seasonally Adjusted)

First estimates show that the Canada industrial composite(2) index of employment (1961 = 100) increased 0.3% from December to January 1983. Increases were registered in all industry divisions except mining (including milling), construction, finance, insurance and real estate and service which decreased. Quebec, Ontario and British Columbia increased while the Atlantic and Prairie regions decreased.

Average weekly earnings at the Canada industrial level decreased by 1.5% from \$408.82 in December 1982 to \$402.67 in January 1983. All industry divisions and all regions registered declines.

Preliminary Data — December 1982

Employment

Seasonally adjusted, preliminary data for December 1982 decreased by 0.3% at the national industrial composite level. Decreases were registered in all industry divisions except trade which increased and transportation, communications and other utilities which remained unchanged. With the exception of Ontario, all regions decreased.

Earnings and Hours

Seasonally adjusted, average weekly earnings increased by 2.0% at the national industrial composite level. All industry divisions and all regions increased.

Unadjusted, average weekly earnings decreased by 0.3% from \$399.79 to \$398.64 at the national industrial level. Average hourly earnings increased by 7 cents in manufacturing to \$10.62 but decreased by 2 cents in mining (including milling) to \$14.25 and remained unchanged in construction at \$15.56. Average weekly hours decreased in mining (including milling), in manufacturing and in construction.

OBSERVATIONS

Premières estimations(1) — Janvier 1983 (chiffres désaisonnalisés)

Les premières estimations de l'indice de l'emploi (1961 = 100) pour l'ensemble des industries(2) au Canada indiquent une hausse de 0.3% entre décembre 1982 et janvier 1983. Toutes les divisions de l'activité économique ont augmenté sauf les mines (y compris le broyage), la construction, les finances, assurances et immeuble et les services qui ont diminué. Le Québec, l'Ontario et la Colombie-Britannique ont augmenté alors que les régions de l'Atlantique et des Prairies ont diminué.

Les gains hebdomadaires moyens pour l'ensemble des industries au Canada ont diminué de 1.5% passant de \$408.82 en décembre 1982 à \$402.67 en janvier 1983. Toutes les divisions de l'activité économique et toutes les régions ont enregistré des baisses.

Chiffres préliminaires — Décembre 1982

Emploi

Après désaisonnalisation, les données pour décembre 1982 ont diminué de 0.3% pour l'ensemble des industries au Canada. Toutes les divisions de l'activité économique ont diminué à l'exception du commerce qui a augmenté et des transports, communications et autres services publics qui n'ont pas varié. Exception faite de l'Ontario, toutes les régions ont diminué.

Gains et Heures

Les gains hebdomadaires moyens, désaisonnalisés, ont augmenté de 2.0% pour l'ensemble des industries au Canada. Toutes les divisions de l'activité économique et toutes les régions ont participé à cette hausse.

Les gains hebdomadaires moyens, non désaisonnalisés, ont diminué de 0.3% passant de \$399.79 à \$398.64 pour l'ensemble des industries au Canada. Les gains horaires moyens ont augmenté de 7 cents dans les manufactures, soit à \$10.62 mais ont diminué de 2 cents dans les mines (y compris le broyage), soit à \$14.25 et sont demeurés inchangés dans la construction à \$15.56. Le nombre moyen d'heures hebdomadaires a diminué dans les mines (y compris le broyage), dans les manufactures et dans la construction.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense.

Changes in the Estimates of Employment, Earnings and Hours

The estimates contained in this publication are obtained from the monthly survey of Employment, Payrolls and Manhours which is under-going a major revision. The new survey is scheduled to replace the existing survey for the April 1983 survey reference month; it has, however, been conducted on a "concurrent" basis since the reference month of March 1982.

The concurrent run is conducted to tune the new automated system, to streamline the processing procedures, to evaluate the quality of the new estimates and to provide means of linking the new to the old estimates (at least for some of the highly aggregated series).

A concurrent (rather than parallel) mode was selected because of Statistics Canada's decision to send only one questionnaire to firms selected for both surveys. As part of the phase-in of the survey, the new questionnaire was sent, for the March 1982 reference month, to one portion of the firms selected for this survey, while the other portion (the firms in the Employment, Payrolls and Manhours survey) was asked to report on the new questionnaire commencing with the reference month of September 1982.

The September 1982 estimates have been affected by the implementation of the new questionnaire which groups the employees in a different manner than the old questionnaire (i.e. the employees are now grouped on the basis of their method of payment rather than on their type of occupation). Henceforth, the proportion of salaried employees to wage-earners has been altered and, consequently, the monthly trends (i.e. changes from August to September) in average weekly earnings, average weekly hours and average hourly earnings estimates for some industries were affected; the monthly trends from September 1982 to March 1983, however, will not be affected by this factor. Unfortunately, the impact of the introduction of the new questionnaire for the September 1982 estimates cannot be quantified.

The major amendments which will be introduced with the new survey for the April 1983 reference month are as follows:

1. The new survey will include firms of all sizes rather than only those with 20 or more employees.
2. The new survey will have a larger industrial coverage than the current survey; education, health and welfare services, and public administration will be added.
3. The new survey will use a mixture of census and sampling methodologies; a part of the sample will rotate each month.
4. The new survey will be based on the 1970 version of the Standard Industrial Classification.
5. The new survey will use the 1981 version for the Standard Geographical Classification.
6. The new survey will produce statistics on overtime earnings and hours, but will eliminate those on employment by sex.

Changements dans les estimations de l'emploi, des gains et de la durée du travail

Les estimations qui apparaissent dans cette publication proviennent de l'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes qui subit présentement une révision majeure. Une nouvelle enquête devrait remplacer définitivement la présente enquête au mois de référence avril 1983; en fait, les deux enquêtes sont conduites simultanément depuis mars 1982.

La production simultanée a pour but de parfaire le nouveau système automatisé, d'y agencer les opérations de traitement, d'évaluer la qualité des nouvelles estimations et d'établir des liens entre les nouvelles et les anciennes estimations (au moins pour certaines séries de niveaux très agrégés).

On a choisi la production simultanée (plutôt que parallèle) à cause de la décision de Statistique Canada de n'envoyer qu'un seul questionnaire à une compagnie (établissement et organisme) choisie par les deux enquêtes. L'une des premières étapes de l'enquête a été d'envoyer le nouveau questionnaire, pour le mois de référence mars 1982, à une partie des compagnies choisies dans la nouvelle enquête. L'autre portion (les compagnies faisant partie de l'enquête sur l'emploi, la rémunération et les heures-hommes) a commencé à utiliser ce nouveau questionnaire au mois de référence septembre 1982.

Les estimations de septembre 1982 ont été affectées par l'utilisation du nouveau questionnaire (qui regroupe les salariés d'une façon différente de l'ancien questionnaire). Avec le nouveau questionnaire, les salariés sont maintenant groupés selon leur mode de paiement plutôt que par leur genre d'occupation. Ainsi la proportion des employés par rapport aux ouvriers a été affectée et, par conséquent, les tendances mensuelles (i.e. les variations d'août à septembre) des gains hebdomadaires moyens, des heures hebdomadaires moyennes et des gains horaires moyens ont subi des changements dans certaines industries; les tendances mensuelles à partir de septembre 1982 à mars 1983 ne seront pas affectées par ce facteur. On ne peut malheureusement pas quantifier l'impact de l'implantation du nouveau questionnaire sur les estimations de septembre 1982.

Les principaux changements qu'entraînera la nouvelle enquête au mois de référence avril 1983 sont les suivants:

1. La nouvelle enquête regroupe des compagnies, établissements et organismes de toutes tailles et ne se restreint plus à celles possédant plus que de 20 salariés.
2. La nouvelle enquête couvrira plus d'industries que l'enquête courante; l'éducation, la santé et les oeuvres sociales, et l'administration publique seront ajoutées.
3. La nouvelle enquête utilisera un mélange de recensement et d'échantillonnage; une partie de l'échantillon sera remplacée chaque mois.
4. La nouvelle enquête utilisera la version 1970 du manuel "Classification des activités économiques".
5. La nouvelle enquête utilisera la version 1981 du manuel "Classification géographique type".
6. La nouvelle enquête fournira des statistiques sur la rémunération pour heures supplémentaires et le nombre d'heures supplémentaires mais ne donnera plus de statistiques sur l'emploi selon le sexe.

7. As explained above, the categories of employees will be according to the methods of payment rather than the type of occupation.
8. The new survey will continue to provide an actual number of employees, but will eliminate the "employment index" relative measure.

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and the "3-digit" industry levels for Canada; the reliability of the estimates will decrease at more disaggregated industrial or geographical levels.

For further details, please contact Labour Division at (613) 992-3868.

7. Comme on l'a déjà mentionné, les salariés seront groupés selon leur mode de paiement plutôt que par leur genre d'occupation.
8. La nouvelle enquête continuera de fournir le nombre réel de salariés mais abandonnera la mesure relative de "l'indice de l'emploi".

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et aux niveaux industriels à trois chiffres pour le Canada; la fiabilité des estimations diminuera à des niveaux industriels et géographiques plus détaillés.

Pour de plus amples informations, contacter la Division du travail au numéro (613) 992-3868.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as most representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Consumer Price Index" Catalogue 62-001. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice des prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Indice des prix à la consommation" no 62-001 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

**SOURCES FOR HISTORICAL DATA ON EMPLOYMENT,
EARNINGS AND HOURS(1)**
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

B. 1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, *Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners 1961-1967 for:

**SOURCES DES DONNÉES CHRONOLOGIQUES SUR L'EMPLOI,
(LES GAINS ET LA DURÉE DU TRAVAIL(1)**
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967*; Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

D. 1977

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of *Catalogue* no. 72-002.

On a révisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'exemplaire de septembre 1977 du numéro 72-002 au catalogue.

E. 1978

E. 1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées

in "Employment, Earnings and Hours, January — April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

F.1980

January 1980 data in Construction and Industrial Composite were revised for New Brunswick, Atlantic Region, Quebec and Canada. The revisions were published in the April 1980 issue of Catalogue 72-002.

May to September 1980 data in Transportation, communication and other utilities, Transportation, Water transport and services and Industrial Composite were revised for Ontario and Canada. The revisions were published in the December 1980 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

F.1980

Les données du mois de janvier 1980 pour le secteur de la construction ainsi que pour l'ensemble des industries, ont été rectifiées pour les provinces du Nouveau Brunswick et du Québec, de la région de l'Atlantique et du Canada. Ces données apparaissent dans l'exemplaire du mois d'avril 1980 du numéro 72-002 au catalogue.

Les données pour les mois de mai à septembre 1980 pour le Transport communication et autres services publics, transports, transports par eau et services et l'ensemble des industries ont été rectifiées pour la province de l'Ontario et le Canada. Ces données apparaissent dans l'exemplaire du mois de décembre 1980 du numéro 72-002 au catalogue.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

CONCEPTS ET MÉTHODES

Objectives

The Monthly Employment, Payrolls and Manhours survey is designed to measure the month-to-month trends of employment, paid hours and earnings for the commercial sector of the economy with the exclusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employment and as weekly averages for earnings and hours paid. The data are compiled and published at detailed industrial and geographic levels.

Source of Data

The statistics contained in this report are based on information obtained through a mail census of "larger firms".

The firm is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but in some cases the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

A firm is considered as "larger" when it employs 20 or more persons in any one month of the year. Although the intent of the survey is to cover all such firms, it also includes some firms with less than 20 employees and excludes some firms with more than 20 employees; the reason is that, in practice, it is not always possible to capture promptly enough employment fluctuations in individual firms.

Universe

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

Coverage

All commercial industries are covered by the survey, with the exception of agriculture, fishing and trapping; by definition such non-commercial sectors as education and related services, health and welfare services, religious organizations, private households and public administration and defense are excluded. Because the survey is limited to "larger firms", the proportion of total employment covered by the survey varies among industries, provinces and urban areas. The following table shows annual employment as compiled in the survey as a percentage of the estimated total number of employees, the latter being estimated by adding together data from the Employment, Payrolls and Manhours survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of the total number of employees are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations du nombre de salariés par province et par industrie" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1981 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1981(1)

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

-) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.
-) Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
-) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.
-) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "gross value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, though not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques, on définit l'établissement, qui consiste habituellement en une usine, une mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this report is based on the Standard Industrial Classification for 1960. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual".

- (a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).
- (b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).
- (c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).
- (d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).
- (e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).
- (f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).
- (g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The metropolitan and urban areas selected for the survey were determined from the 1966 Census of Population. The delimitation of the nineteen "Metropolitan Areas" were subsequently adjusted to the 1971 and 1976 Censuses of Population's definitions; the definitions used for other urban areas are based on a labour market concept. The urban areas usually consist of the urban centre as well as the surrounding territory. A list showing the territory included in

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel de la classification type des industries," no 12-501 au catalogue.

- a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)
- b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).
- c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).
- d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).
- e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).
- f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).
- g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. Les régions métropolitaines et les régions urbaines sélectionnées pour cette enquête ont été déterminées à partir du recensement de 1966 de la population. Les limites des 19 "régions métropolitaines" ont par la suite été modifiées en fonction des définitions utilisées aux fins des recensements de la population de 1971 et 1976; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché

each tabulated urban area is available from the Employment and Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

du travail. Une région urbaine se compose habituellement d'un centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer une liste indiquant le territoire compris dans chaque région urbaine figurant dans les tableaux en vous adressant à la Section des statistiques de l'emploi et de la rémunération. Les chiffres des unités déclarantes situées ailleurs que dans une région urbaine indiquée dans les tableaux ou non attribuées à un comté dont le nom figure sur la liste font partie des totaux provinciaux, régionaux et nationaux.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to strikes, unpaid holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to reflect the situation of the last seven days of the month.

Definitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. En pratique, étant donné que peu d'entreprises tiennent des registres de paye pour cette période précise, on leur permet de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en effectuant le calcul suivant: on divise le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une grève, d'un congé non payé ou d'autres facteurs semblables, les données déclarées ne sont pas représentatives de la période de référence, on procède aux rajustements qui s'imposent afin de traduire la situation pendant les sept derniers jours du mois.

2. Employee

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee paid for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) Wage-earners

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be

2. Salarié

Toute personne qui est rétribuée pour ses services ou ses absences pendant la semaine de référence et pour laquelle l'employeur verse des contributions au R.P.C. ou au R.R.Q. et à la caisse d'assurance-chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels (ceux qui sont embauchés de façon temporaire ou irrégulière et qui ont travaillé au moins sept heures au cours de la période de référence). Elle comprend aussi les propriétaires, les administrateurs, les associés et les autres dirigeants d'entreprises constituées en société.

Le concept des salariés exclut les propriétaires et les partenaires d'entreprises non constituées en corporation et ceux qui possèdent un bureau pour l'exercice d'une profession, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres de corps élus ou nommés, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire.

Sont visées les personnes qui ont été payées pendant une partie de la période de référence mais qui étaient en chômage ou en grève pendant le reste de la période. Les personnes n'ayant pas touché de paye pour la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit les employés et les ouvriers:

a) Ouvriers

Cette catégorie comprend les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Toutes ces personnes sont considérées comme des ou-

wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

(b) Salaried Employees

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

3. Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

4. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

5. Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to firms covered by the survey. In order to improve the quality of data, the response rate

vriers, que leurs gains soient fondés sur des taux de rémunération mensuels, horaires ou autres. Les salaires hebdomadaires moyens sont calculés pour tous les ouvriers, mais les heures hebdomadaires moyennes et les gains horaires moyens sont calculés uniquement pour ceux dont on connaît le nombre d'heures de travail.

b) Employés

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. Gains

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. Absence payée

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. Semaine normale de travail

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été recueillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises faisant partie de l'enquête. Afin d'améliorer la qualité des

is increased through two reminders mailed to all non-respondents one month and two months after the initial mail-out. If the two reminders do not produce a response, the Regional Operations Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are still accounted for in the employment, earnings and hours tables of this publication. The method for imputing for non-response is explained under 'Imputation' below.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computer edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units similar with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the same unit of the previous month and/or for the imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, or when only partial response is received, the record is signaled by the computer edit for inspection and subject to correction or acceptance as appropriate.

2. Imputation

Every month, there are reporting units for which no response is received. For those newly introduced into the survey, data are manually imputed based on other sources of information such as the employment intention of the firm and the characteristics of firms in the same industry and geographic area.

Imputation for reporting units, for which data for the previous month are available, is based on the monthly changes reported by responding units within the same imputation group. A ratio of monthly change for each characteristic is applied to the previous month's data of each non respondent.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Man-hours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units. The problems associated in identifying all in-scope reporting units in a timely fashion, incorrect responses supplied by respondents and errors in coding and processing data. Non-sampling errors are difficult to measure and no estimate of this type of error has been obtained for this survey. However, every attempt has been made to minimize

données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi initial du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. La méthode d'imputation pour les entreprises non répondantes est expliquée ci-dessous sous la rubrique 'Imputation'.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiées par ordinateur, les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante du mois précédent pour la même unité déclarante et/ou pour le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, ou lorsqu'on ne reçoit qu'une réponse partielle, l'unité déclarante est signalée lors de la vérification par ordinateur pour inspection et est sujette à être corrigée ou acceptée selon le cas.

2. Imputation

Chaque mois il existe certaines unités déclarantes dont on ne reçoit aucune réponse. Pour ces unités qui sont nouvellement introduites dans l'enquête, les données sont imputées manuellement et sont basées sur d'autres sources d'information telles que l'intention d'emploi de la firme et les caractéristiques des entreprises qui font partie de la même branche d'activité et qui sont situées dans le même lieu géographique.

L'imputation des unités déclarantes dont les données du mois précédent sont disponibles, est basée sur les changements mensuels rapportés par les unités déclarantes faisant partie du même groupe d'imputation. Un rapport du changement mensuel pour chaque caractéristique est appliqué aux données du mois précédent pour chaque entreprise non répondante.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités faisant partie de l'enquête, les problèmes associés avec l'identification de toutes les unités qui devraient faire partie de l'enquête et ce dans le plus bref délai, les renseignements inexacts fournis par les entreprises répondantes et les erreurs de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas établi d'estimation de ce genre d'erreur pour

non-sampling errors by the use of a carefully designed and carefully worded questionnaire, the relative simplicity of the data requested, follow-up of non-respondents, thorough editing of data and control of the processing operations.

Statistical Presentation

1. Data Revision

Each month, statistics for the three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 55%) and only highly aggregated figures are re-released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current month and third estimates for the month prior to that. For both of these estimates which are based on a higher rate of response (approximately 75% and 82% respectively), full details are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate large changes. The section, "Sources for Historical Data on Employment, Earnings and Hours", lists the issues that contain the revisions received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

2. Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

The technique used assumed that the change was applicable to the base period. When this assumption is incorrect, a bias is introduced in the long term trends.

3. Averages

Average weekly earnings for all employees are obtained by dividing the total weekly payrolls by the total number of employees. Average weekly earnings for salaried employees are obtained by dividing the total weekly salaries by the total number of salaried employees. Average weekly earnings for all wage-earners are obtained by dividing the total weekly wages by the total number of wage-earners.

Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. The average weekly hours figure is obtained

cette enquête. Toutefois, tous les efforts ont été faits pour minimiser les erreurs d'observation grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième pour le mois qui précède celui-là. La présente publication contient tous les détails, pour ces deux dernières estimations qui sont basées sur un plus grand nombre de réponses (environ 75% pour les deuxième estimations et 82% pour les troisième).

Une fois terminées les troisième estimations, on modifie à l'occasion les données à la lumière de révisions importantes. La partie intitulée "Sources des données chronologiques sur l'emploi, les gains et la durée du travail" énumère les publications contenant les révisions.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

Cette procédure, suppose que le changement, s'appliquait aussi à l'année de base, lorsque cette hypothèse s'avère fausse, un biais se crée dans les tendances à long-terme.

3. Moyennes

On obtient les rémunérations hebdomadaires moyennes en divisant les rémunérations hebdomadaires totales par le nombre total de salariés. On obtient les rémunérations hebdomadaires moyennes pour les employés à salaire en divisant le total des salaires hebdomadaires par le nombre total d'employés à salaire. On obtient les rémunérations hebdomadaires pour les ouvriers en divisant le total des rémunérations hebdomadaires des ouvriers par le nombre total des ouvriers.

On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures par semaine. On calcule les heures hebdomadaires

by dividing total weekly man-hours by the number of wage-earners who were paid for those hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series, January 1961 - December 1977" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont été payés pour ces heures. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du U.S. *Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 décembre 1977*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 992-5613) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(949-4020)

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

1. In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTES

1. On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates(1) — February 1983 (Seasonally Adjusted)

First estimates show that the Canada industrial composite(2) index of employment (1961 = 100) increased 0.1% from January to February 1983. Increases were registered in all industry divisions except manufacturing, construction and service which decreased. Quebec and Ontario increased while British Columbia remained unchanged and the Atlantic and Prairie regions decreased.

Average weekly earnings at the Canada industrial level decreased by 0.2% from \$405.17 in January to \$404.50 in February 1983. With the exception of manufacturing and construction, all industry divisions decreased. All regions decreased except the Atlantic region and Ontario which increased.

Preliminary Data — January 1983

Employment

Seasonally adjusted, preliminary data for January 1983 decreased by 0.1% at the national industrial composite level. Forestry and manufacturing increased while the remaining industry divisions decreased. Decreases were registered in the Prairie region while the remaining regions increased.

Earnings and Hours

Seasonally adjusted, average weekly earnings decreased by 0.9% at the national industrial composite level. With the exception of manufacturing, all industry divisions decreased. All regions contributed to the decrease except British Columbia which increased.

Unadjusted, average weekly earnings increased by 1.6% from \$398.69 to \$405.13 at the national industrial level. Average hourly earnings increased by 8 cents in manufacturing to \$10.70, by 34 cents in construction to \$15.85 and remained unchanged in mining (including milling) at \$14.32. Average weekly hours increased in mining (including milling), in manufacturing and in construction.

Following are two tables summarizing the variations in all industry divisions that occurred in 1982 compared to 1981.

- (1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.
- (2) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence.

OBSERVATIONS

Premières estimations(1) — Février 1983 (chiffres désaisonnalisés)

Les premières estimations de l'indice de l'emploi (1961 = 100) pour l'ensemble des industries (2) au Canada indiquent une hausse de 0.1% entre janvier et février 1983. Toutes les divisions de l'activité économique ont augmenté sauf les manufactures, la construction et les services qui ont diminué. Le Québec et l'Ontario ont augmenté alors que la Colombie-Britannique n'a pas varié et que les régions de l'Atlantique et des Prairies ont diminué.

Les gains hebdomadaires moyens pour l'ensemble des industries au Canada ont diminué de 0.2% passant de \$405.17 à \$404.50 en février 1983. Exception faite des manufactures et de la construction, toutes les divisions de l'activité économique ont diminué. Toutes les régions ont diminué à l'exception de la région de l'Atlantique et de l'Ontario qui ont augmenté.

Chiffres préliminaires — Janvier 1983

Emploi

Après désaisonnalisation, les données pour janvier 1983 ont diminué de 0.1% pour l'ensemble des industries au Canada. Exception faite du forestage et des manufactures qui ont augmenté, toutes les divisions de l'activité économique ont diminué. Seule la région des Prairies a diminué alors que les autres régions ont augmenté.

Gains et Heures

Les gains hebdomadaires moyens, désaisonnalisés, ont diminué de 0.9% pour l'ensemble des industries du Canada. Exception faite des manufactures, toutes les divisions de l'activité économique ont diminué. Toutes les régions ont diminué sauf la Colombie-Britannique qui a augmenté.

Les gains hebdomadaires moyens, non désaisonnalisés, ont augmenté de 1.6% passant de \$398.69 à \$405.13 pour l'ensemble des industries au Canada. Les gains horaires moyens ont augmenté de 8 cents dans les manufactures, soit à \$10.70, de 34 cents dans la construction, soit à \$15.85 et sont demeurés inchangés dans les mines (y compris le broyage) à \$14.32. Le nombre moyen d'heures hebdomadaires a augmenté dans les mines (y compris le broyage), dans les manufactures et dans la construction.

Les deux tableaux suivants résument les changements dans toutes les divisions de l'activité économique qui se sont produits en 1982 comparativement à 1981.

- (1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
- (2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense.

NOTE TO USERS

NOTE AUX UTILISATEURS

Changes in the Estimates of Employment, Earnings and Hours

Changements dans les estimations de l'emploi, des gains et de la durée du travail

The estimates contained in this publication are obtained from the monthly survey of Employment, Payrolls and Manhours which is under-going a major revision. The new survey is scheduled to replace the existing survey for the April 1983 survey reference month; it has, however, been conducted on a "concurrent" basis since the reference month of March 1982.

Les estimations qui apparaissent dans cette publication proviennent de l'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes qui subit présentement une révision majeure. Une nouvelle enquête devrait remplacer définitivement la présente enquête au mois de référence avril 1983; en fait, les deux enquêtes sont conduites simultanément depuis mars 1982.

The concurrent run is conducted to tune the new automated system, to streamline the processing procedures, to evaluate the quality of the new estimates and to provide means of linking the new to the old estimates (at least for some of the highly aggregated series).

La production simultanée a pour but de parfaire le nouveau système automatisé, d'y agencer les opérations de traitement, d'évaluer la qualité des nouvelles estimations et d'établir des liens entre les nouvelles et les anciennes estimations (au moins pour certaines séries de niveaux très agrégés).

A concurrent (rather than parallel) mode was selected because of Statistics Canada's decision to send only one questionnaire to firms selected for both surveys. As part of the phase-in of the survey, the new questionnaire was sent, for the March 1982 reference month, to one portion of the firms selected for this survey, while the other portion (the firms in the Employment, Payrolls and Manhours survey) was asked to report on the new questionnaire commencing with the reference month of September 1982.

On a choisi la production simultanée (plutôt que parallèle) à cause de la décision de Statistique Canada de n'envoyer qu'un seul questionnaire à une compagnie (établissement et organisme) choisie par les deux enquêtes. L'une des premières étapes de l'enquête a été d'envoyer le nouveau questionnaire, pour le mois de référence mars 1982, à une partie des compagnies choisies dans la nouvelle enquête. L'autre portion (les compagnies faisant partie de l'enquête sur l'emploi, la rémunération et les heures-hommes) a commencé à utiliser ce nouveau questionnaire au mois de référence septembre 1982.

The September 1982 estimates have been affected by the implementation of the new questionnaire which groups the employees in a different manner than the old questionnaire (i.e. the employees are now grouped on the basis of their method of payment rather than on their type of occupation). Henceforth, the proportion of salaried employees to wage-earners has been altered and, consequently, the monthly trends (i.e. changes from August to September) in average weekly earnings, average weekly hours and average hourly earnings estimates for some industries were affected; the monthly trends from September 1982 to March 1983, however, will not be affected by this factor. Unfortunately, the impact of the introduction of the new questionnaire for the September 1982 estimates cannot be quantified.

Les estimations de septembre 1982 ont été affectées par l'utilisation du nouveau questionnaire (qui regroupe les salariés d'une façon différente de l'ancien questionnaire). Avec le nouveau questionnaire, les salariés sont maintenant groupés selon leur mode de paiement plutôt que par leur genre d'occupation. Ainsi la proportion des employés par rapport aux ouvriers a été affectée et, par conséquent, les tendances mensuelles (i.e. les variations d'août à septembre) des gains hebdomadaires moyens, des heures hebdomadaires moyennes et des gains horaires moyens ont subi des changements dans certaines industries; les tendances mensuelles à partir de septembre 1982 à mars 1983 ne seront pas affectées par ce facteur. On ne peut malheureusement pas quantifier l'impact de l'implantation du nouveau questionnaire sur les estimations de septembre 1982.

The major amendments which will be introduced with the new survey for the April 1983 reference month are as follows:

Les principaux changements qu'entraînera la nouvelle enquête au mois de référence avril 1983 sont les suivants:

1. The new survey will include firms of all sizes rather than only those with 20 or more employees.
2. The new survey will have a larger industrial coverage than the current survey; education, health and welfare services, and public administration will be added.
3. The new survey will use a mixture of census and sampling methodologies; a part of the sample will rotate each month.
4. The new survey will be based on the 1970 version of the Standard Industrial Classification.
5. The new survey will use the 1981 version for the Standard Geographical Classification.
6. The new survey will produce statistics on overtime earnings and hours, but will eliminate those on employment by sex.

1. La nouvelle enquête regroupe des compagnies, établissements et organismes de toutes tailles et ne se restreint plus à celles possédant plus que de 20 salariés.
2. La nouvelle enquête couvrira plus d'industries que l'enquête courante; l'éducation, la santé et les oeuvres sociales, et l'administration publique seront ajoutées.
3. La nouvelle enquête utilisera un mélange de recensement et d'échantillonnage; une partie de l'échantillon sera remplacée chaque mois.
4. La nouvelle enquête utilisera la version 1970 du manuel "Classification des activités économiques".
5. La nouvelle enquête utilisera la version 1981 du manuel "Classification géographique type".
6. La nouvelle enquête fournira des statistiques sur la rémunération pour heures supplémentaires et le nombre d'heures supplémentaires mais ne donnera plus de statistiques sur l'emploi selon le sexe.

7. As explained above, the categories of employees will be according to the methods of payment rather than the type of occupation.
8. The new survey will continue to provide an actual number of employees, but will eliminate the "employment index" relative measure.

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and the "3-digit" industry levels for Canada; the reliability of the estimates will decrease at more disaggregated industrial or geographical levels.

For further details, please contact Labour Division at (613) 992-3868.

7. Comme on l'a déjà mentionné, les salariés seront groupés selon leur mode de paiement plutôt que par leur genre d'occupation.
8. La nouvelle enquête continuera de fournir le nombre réel de salariés mais abandonnera la mesure relative de "l'indice de l'emploi".

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et aux niveaux industriels à trois chiffres pour le Canada; la fiabilité des estimations diminuera à des niveaux industriels et géographiques plus détaillés.

Pour de plus amples informations, contacter la Division du travail au numéro (613) 992-3868.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Consumer Price Index" Catalogue 62-001. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Note: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Indice des prix à la consommation" no 62-001 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For details of the statistical method of the index of the price of consumption, see monthly report "Consumer Price Index" Catalogue 62-001. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Indice des prix à la consommation" no 62-001 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

**SOURCES FOR HISTORICAL DATA ON EMPLOYMENT,
EARNINGS AND HOURS(1)**
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. Catalogue 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners 1961-1967 for:

**SOURCES DES DONNÉES CHRONOLOGIQUES SUR L'EMPLOI,
(LES GAINS ET LA DURÉE DU TRAVAIL(1))**
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967*; Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of *Catalogue* no. 72-002.

E. 1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les n°s 72-201 et 72-202 au catalogue, 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communications et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires— moyennes et rémunération horaire moyenne des ouvriers (heures— déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

D. 1977

On a révisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'exemplaire de septembre 1977 du numéro 72-002 au catalogue.

E. 1978

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées

in "Employment, Earnings and Hours, January — April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

F.1980

January 1980 data in Construction and Industrial Composite were revised for New Brunswick, Atlantic Region, Quebec and Canada. The revisions were published in the April 1980 issue of Catalogue 72-002.

May to September 1980 data in Transportation, communication and other utilities, Transportation, Water transport and services and Industrial Composite were revised for Ontario and Canada. The revisions were published in the December 1980 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

F.1980

Les données du mois de janvier 1980 pour le secteur de la construction ainsi que pour l'ensemble des industries, ont été rectifiées pour les provinces du Nouveau Brunswick et du Québec, de la région de l'Atlantique et du Canada. Ces données apparaissent dans l'exemplaire du mois d'avril 1980 du numéro 72-002 au catalogue.

Les données pour les mois de mai à septembre 1980 pour le Transport communication et autres services publics, transports, transports par eau et services et l'ensemble des industries ont été rectifiées pour la province de l'Ontario et le Canada. Ces données apparaissent dans l'exemplaire du mois de décembre 1980 du numéro 72-002 au catalogue.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Objectives

The Monthly Employment, Payrolls and Manhours survey is designed to measure the month-to-month trends of employment, paid hours and earnings for the commercial sector of the economy with the exclusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employment and as weekly averages for earnings and hours paid. The data are compiled and published at detailed industrial and geographic levels.

Source of Data

The statistics contained in this report are based on information obtained through a mail census of "larger firms".

The firm is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but in some cases the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

A firm is considered as "larger" when it employs 20 or more persons in any one month of the year. Although the intent of the survey is to cover all such firms, it also includes some firms with less than 20 employees and excludes some firms with more than 20 employees; the reason is that, in practice, it is not always possible to capture promptly enough employment fluctuations in individual firms.

Universe

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

Coverage

All commercial industries are covered by the survey, with the exception of agriculture, fishing and trapping; by definition such non-commercial sectors as education and related services, health and welfare services, religious organizations, private households and public administration and defense are excluded. Because the survey is limited to "larger firms", the proportion of total employment covered by the survey varies among industries, provinces and urban areas. The following table shows annual employment as compiled in the survey as a percentage of the estimated total number of employees, the latter being estimated by adding together data from the Employment, Payrolls and Manhours survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of the total number of employees are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune de ces entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central de employeurs tenu à jour par la Division des profils et du registre de entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; et sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations du nombre de salariés par province et par industrie" numéro 72-008 au catalogue.

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is engaged in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "gross value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques, on définit l'établissement, qui consiste habituellement en une usine, une mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this report is based on the Standard Industrial Classification for 1960. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual".

- (a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).
- (b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).
- (c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).
- (d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).
- (e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).
- (f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).
- (g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel de la classification type des industries," no 12-501 au catalogue.

- a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)
- b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).
- c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).
- d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).
- e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).
- f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).
- g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The metropolitan and urban areas selected for the survey were determined from the 1966 Census of Population. The delimitation of the nineteen "Metropolitan Areas" were subsequently adjusted to the 1971 and 1976 Censuses of Population's definitions; the definitions used for other urban areas are based on a labour market concept. The urban areas usually consist of the urban centre as well as the surrounding territory. A list showing the territory included in

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. Les régions métropolitaines et les régions urbaines sélectionnées pour cette enquête ont été déterminées à partir du recensement de 1966 de la population. Les limites des 19 "régions métropolitaines" ont par la suite été modifiées en fonction des définitions utilisées aux fins des recensements de la population de 1971 et 1976; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché

each tabulated urban area is available from the Employment and Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

du travail. Une région urbaine se compose habituellement d'un centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer une liste indiquant le territoire compris dans chaque région urbaine figurant dans les tableaux en vous adressant à la Section des statistiques de l'emploi et de la rémunération. Les chiffres des unités déclarantes situées ailleurs que dans une région urbaine indiquée dans les tableaux ou non attribuées à un comté dont le nom figure sur la liste font partie des totaux provinciaux, régionaux et nationaux.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to strikes, unpaid holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to reflect the situation of the last seven days of the month.

2. Employee

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee paid for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) Wage-earners

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be

Définitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. En pratique, étant donné que peu d'entreprises tiennent des registres de paye pour cette période précise, on leur permet de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en effectuant le calcul suivant: on divise le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une grève, d'un congé non payé ou d'autres facteurs semblables, les données déclarées ne sont pas représentatives de la période de référence, on procède aux rajustements qui s'imposent afin de traduire la situation pendant les sept derniers jours du mois.

2. Salarié

Toute personne qui est rétribuée pour ses services ou ses absences pendant la semaine de référence et pour laquelle l'employeur verse des contributions au R.P.C. ou au R.R.Q. et à la caisse d'assurance-chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels (ceux qui sont embauchés de façon temporaire ou irrégulière et qui ont travaillé au moins sept heures au cours de la période de référence). Elle comprend aussi les propriétaires, les administrateurs, les associés et les autres dirigeants d'entreprises constituées en société.

Le concept des salariés exclut les propriétaires et les partenaires d'entreprises non constituées en corporation et ceux qui possèdent un bureau pour l'exercice d'une profession, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres de corps élus ou nommés, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire.

Sont visées les personnes qui ont été payées pendant une partie de la période de référence mais qui étaient en chômage ou en grève pendant le reste de la période. Les personnes n'ayant pas touché de paye pour la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit les employés et les ouvriers:

a) Ouvriers

Cette catégorie comprend les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livriers, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Toutes ces personnes sont considérées comme des ou-

wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

(b) Salaried Employees

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

3. Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

4. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

5. Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to firms covered by the survey. In order to improve the quality of data, the response rate

vriers, que leurs gains soient fondés sur des taux de rémunération mensuels, horaires ou autres. Les salaires hebdomadaires moyens sont calculés pour tous les ouvriers, mais les heures hebdomadaires moyennes et les gains horaires moyens sont calculés uniquement pour ceux dont on connaît le nombre d'heures de travail.

b) Employés

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. Gains

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. Absence payée

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. Semaine normale de travail

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été recueillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises faisant partie de l'enquête. Afin d'améliorer la qualité des

is increased through two reminders mailed to all non-respondents one month and two months after the initial mail-out. If the two reminders do not produce a response, the Regional Operations Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are still accounted for in the employment, earnings and hours tables of this publication. The method for imputing for non-response is explained under 'Imputation' below.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computer edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units similar with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the same unit of the previous month and/or for the imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, or when only partial response is received, the record is signaled by the computer edit for inspection and subject to correction or acceptance as appropriate.

2. Imputation

Every month, there are reporting units for which no response is received. For those newly introduced into the survey, data are manually imputed based on other sources of information such as the employment intention of the firm and the characteristics of firms in the same industry and geographic area.

Imputation for reporting units, for which data for the previous month are available, is based on the monthly changes reported by responding units within the same imputation group. A ratio of monthly change for each characteristic is applied to the previous month's data of each non respondent.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Man-hours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units. The problems associated in identifying all in-scope reporting units in a timely fashion, incorrect responses supplied by respondents and errors in coding and processing data. Non-sampling errors are difficult to measure and no estimate of this type of error has been obtained for this survey. However, every attempt has been made to minimize

données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi initial du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'un interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. La méthode d'imputation pour les entreprises non répondantes est expliquée ci-dessous sous la rubrique "Imputation".

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiées par ordinateur, les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante du mois précédent pour la même unité déclarante et/ou pour le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, ou lorsqu'on ne reçoit qu'une réponse partielle, l'unité déclarante est signalée lors de la vérification par ordinateur pour inspection et est sujette à être corrigée ou acceptée selon le cas.

2. Imputation

Chaque mois il existe certaines unités déclarantes dont on ne reçoit aucune réponse. Pour ces unités qui sont nouvellement introduites dans l'enquête, les données sont imputées manuellement et sont basées sur d'autres sources d'information telles que l'intention d'emploi de la firme et les caractéristiques des entreprises qui font partie de la même branche d'activité et qui sont situées dans le même lieu géographique.

L'imputation des unités déclarantes dont les données du mois précédent sont disponibles, est basée sur les changements mensuels rapportés par les unités déclarantes faisant partie du même groupe d'imputation. Un rapport du changement mensuel pour chaque caractéristique est appliqué aux données du mois précédent pour chaque entreprise non répondante.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités faisant partie de l'enquête, les problèmes associés avec l'identification de toutes les unités qui devraient faire partie de l'enquête et ce dans le plus bref délai, les renseignements inexacts fournis par les entreprises répondantes et les erreurs de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas établi d'estimation de ce genre d'erreur pour

non-sampling errors by the use of a carefully designed and carefully worded questionnaire, the relative simplicity of the data requested, follow-up of non-respondents, thorough editing of data and control of the processing operations.

Statistical Presentation

1. Data Revision

Each month, statistics for the three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current month and third estimates for the month prior to that. For both of these estimates which are based on a higher rate of response (approximately 75% and 82% respectively), full details are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate large changes. The section, "Sources for Historical Data on Employment, Earnings and Hours", lists the issues that contain the revisions received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

2. Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

The technique used assumed that the change was applicable to the base period. When this assumption is incorrect, a bias is introduced in the long term trends.

3. Averages

Average weekly earnings for all employees are obtained by dividing the total weekly payrolls by the total number of employees. Average weekly earnings for salaried employees are obtained by dividing the total weekly salaries by the total number of salaried employees. Average weekly earnings for all wage-earners are obtained by dividing the total weekly wages by the total number of wage-earners.

Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. The average weekly hours figure is obtained

cette enquête. Toutefois, tous les efforts ont été faits pour minimiser les erreurs d'observation grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième pour le mois qui précède celui-là. La présente publication contient tous les détails, pour ces deux dernières estimations qui sont basées sur un plus grand nombre de réponses (environ 75% pour les deuxième estimations et 82% pour les troisième).

Une fois terminées les troisième estimations, on modifie à l'occasion les données à la lumière de révisions importantes. La partie intitulée "Sources des données chronologiques sur l'emploi, les gains et la durée du travail" énumère les publications contenant les révisions.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

Cette procédure, suppose que le changement, s'appliquait aussi à l'année de base, lorsque cette hypothèse s'avère fautive, un biais se crée dans les tendances à long-terme.

3. Moyennes

On obtient les rémunérations hebdomadaires moyennes en divisant les rémunérations hebdomadaires totales par le nombre total de salariés. On obtient les rémunérations hebdomadaires moyennes pour les employés à salaire en divisant le total des salaires hebdomadaires par le nombre total d'employés à salaire. On obtient les rémunérations hebdomadaires pour les ouvriers en divisant le total des rémunérations hebdomadaires des ouvriers par le nombre total des ouvriers.

On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures par semaine. On calcule les heures hebdomadaires

by dividing total weekly man-hours by the number of wage-earners who were paid for those hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series, January 1961 - December 1977" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont été payés pour ces heures. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du U.S. *Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 décembre 1977*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.

publication; see page vi for more
information.

CHANGEMENTS IMPORTANTS en
ce qui a trait aux données de cette
publication; pour de plus amples
informations, voir à la page vi.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 992-5613) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Zenith 2-2015

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

Terre-Neuve et Labrador	Zénith 0-7037

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

1. In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTES

1. On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates(1) — March 1983 (Seasonally Adjusted)

First estimates show that the Canada industrial composite (2) index of employment (1961 = 100) decreased 4% from February to March 1983. Decreases were registered in all industry divisions except forestry which increased. All regions decreased except the Atlantic region which increased and Ontario which remained unchanged.

Average weekly earnings at the Canada industrial level increased by 0.7% from \$405.95 in February to \$408.90 in March 1983. With the exception of forestry, construction and finance, insurance and real estate, all industry divisions increased. All regions contributed to the increase.

Preliminary Data — February 1983

Employment

Seasonally adjusted, preliminary data for February 1983 increased by 0.1% at the national industrial composite level. Increases were registered in all industry divisions except manufacturing, construction and service which decreased. The regions of Ontario, Prairie and British Columbia increased while Quebec remained unchanged and the Atlantic region decreased.

Earnings and Hours

Seasonally adjusted, average weekly earnings increased slightly by 0.1% at the national industrial composite level. With the exception of mining (including milling) and trade, all industry divisions increased. Increases were registered only in Quebec and Ontario.

Unadjusted, average weekly earnings increased by 0.4% from \$405.62 to \$407.13 at the national industrial level. Average hourly earnings increased by 2 cents in manufacturing to \$10.73 and by 9 cents in construction to \$15.92 but decreased by 3 cents in mining (including milling) to \$14.32. Average weekly hours increased in manufacturing but decreased in mining (including milling) and in construction.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence.

OBSERVATIONS

Premières estimations(1) — Mars 1983 (chiffres désaisonnalisés)

Les premières estimations de l'indice de l'emploi (1961 = 100) pour l'ensemble des industries (2) au Canada indiquent une baisse de 0.4% entre février 1983 et mars 1983. Toutes les divisions de l'activité économique ont diminué à l'exception du forestage qui a augmenté. Toutes les régions ont diminué à l'exception de la région de l'Atlantique qui a augmenté et de l'Ontario qui n'a pas varié.

Les gains hebdomadaires moyens pour l'ensemble des industries au Canada ont augmenté de 0.7% passant de \$405.95 en février à \$408.90 en mars 1983. Exception faite du forestage, de la construction et des finances, assurances et immeuble, toutes les divisions de l'activité économique ont augmenté. Toutes les régions ont participé à cette augmentation.

Chiffres préliminaires — Février 1983

Emploi

Après désaisonnalisation, les données pour février 1983 ont augmenté de 0.1% pour l'ensemble des industries au Canada. Toutes les divisions de l'activité économique ont augmenté sauf les manufactures, la construction et les services qui ont diminué. Les régions de l'Ontario, des Prairies et de la Colombie-Britannique ont augmenté alors que le Québec n'a pas varié et que la région de l'Atlantique a diminué.

Gains et Heures

Les gains hebdomadaires moyens désaisonnalisés, ont augmenté de 0.1% pour l'ensemble des industries au Canada. Exception faite des mines (y compris le broyage) et du commerce, toutes les divisions de l'activité économique ont augmenté. Seules les régions du Québec et de l'Ontario ont enregistré des gains.

Les gains hebdomadaires moyens, non désaisonnalisés, ont augmenté de 0.4% passant de \$405.62 à \$407.13 pour l'ensemble des industries au Canada. Les gains horaires moyens ont augmenté de 2 cents dans les manufactures, soit à \$10.73 et de 9 cents dans la construction, soit à \$15.92 mais ont diminué de 3 cents dans les mines (y compris le broyage), soit à \$14.32. Le nombre moyen d'heures hebdomadaires a augmenté dans les manufactures mais a diminué dans les mines (y compris le broyage) et dans la construction.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense.

Changes in the Estimates of Employment, Earnings and Hours

The estimates contained in this publication are obtained from the monthly survey of Employment, Payrolls and Manhours which is under-going a major revision. The new survey is scheduled to replace the existing survey for the April 1983 survey reference month; it has, however, been conducted on a "concurrent" basis since the reference month of March 1982.

The concurrent run is conducted to tune the new automated system, to streamline the processing procedures, to evaluate the quality of the new estimates and to provide means of linking the new to the old estimates (at least for some of the highly aggregated series).

A concurrent (rather than parallel) mode was selected because of Statistics Canada's decision to send only one questionnaire to firms selected for both surveys. As part of the phase-in of the survey, the new questionnaire was sent, for the March 1982 reference month, to one portion of the firms selected for this survey, while the other portion (the firms in the Employment, Payrolls and Manhours survey) was asked to report on the new questionnaire commencing with the reference month of September 1982.

The September 1982 estimates have been affected by the implementation of the new questionnaire which groups the employees in a different manner than the old questionnaire (i.e. the employees are now grouped on the basis of their method of payment rather than on their type of occupation). Henceforth, the proportion of salaried employees to wage-earners has been altered and, consequently, the monthly trends (i.e. changes from August to September) in average weekly earnings, average weekly hours and average hourly earnings estimates for some industries were affected; the monthly trends from September 1982 to March 1983, however, will not be affected by this factor. Unfortunately, the impact of the introduction of the new questionnaire for the September 1982 estimates cannot be quantified.

The major amendments which will be introduced with the new survey for the April 1983 reference month are as follows:

1. The new survey will include firms of all sizes rather than only those with 20 or more employees.
2. The new survey will have a larger industrial coverage than the current survey; education, health and welfare services, and public administration will be added.
3. The new survey will use a mixture of census and sampling methodologies; a part of the sample will rotate each month.
4. The new survey will be based on the 1970 version of the Standard Industrial Classification.
5. The new survey will use the 1981 version for the Standard Geographical Classification.
6. The new survey will produce statistics on overtime earnings and hours, but will eliminate those on employment by sex.

Changements dans les estimations de l'emploi, des gains et de la durée du travail

Les estimations qui apparaissent dans cette publication proviennent de l'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes qui subit présentement une révision majeure. Une nouvelle enquête devrait remplacer définitivement la présente enquête au mois de référence avril 1983; en fait, les deux enquêtes sont conduites simultanément depuis mars 1982.

La production simultanée a pour but de parfaire le nouveau système automatisé, d'y agencer les opérations de traitement, d'évaluer la qualité des nouvelles estimations et d'établir des liens entre les nouvelles et les anciennes estimations (au moins pour certaines séries de niveaux très agrégés).

On a choisi la production simultanée (plutôt que parallèle) en raison de la décision de Statistique Canada de n'envoyer qu'un seul questionnaire à une compagnie (établissement et organisme) choisie par les deux enquêtes. L'une des premières étapes de l'enquête a été d'envoyer le nouveau questionnaire, pour le mois de référence mars 1982, à une partie des compagnies choisies dans la nouvelle enquête. L'autre portion (les compagnies faisant partie de l'enquête sur l'emploi, la rémunération et les heures-hommes) a commencé à utiliser ce nouveau questionnaire au mois de référence septembre 1982.

Les estimations de septembre 1982 ont été affectées par l'utilisation du nouveau questionnaire (qui regroupe les salariés d'une façon différente de l'ancien questionnaire). Avec le nouveau questionnaire, les salariés sont maintenant groupés selon leur mode de paiement plutôt que par leur genre d'occupation. Ainsi la proportion de employés par rapport aux ouvriers a été affectée et, par conséquent, les tendances mensuelles (i.e. les variations d'août à septembre) de gains hebdomadaires moyens, des heures hebdomadaires moyennes et des gains horaires moyens ont subi des changements dans certaines industries; les tendances mensuelles à partir de septembre 1982 mars 1983 ne seront pas affectées par ce facteur. On ne peut malheureusement pas quantifier l'impact de l'implantation du nouveau questionnaire sur les estimations de septembre 1982.

Les principaux changements qu'entraînera la nouvelle enquête au mois de référence avril 1983 sont les suivants:

1. La nouvelle enquête regroupe des compagnies, établissements et organismes de toutes tailles et ne se restreint plus à celle possédant plus que de 20 salariés.
2. La nouvelle enquête couvrira plus d'industries que l'enquête courante; l'éducation, la santé et les oeuvres sociales, et l'administration publique seront ajoutées.
3. La nouvelle enquête utilisera un mélange de recensement d'échantillonnage; une partie de l'échantillon sera remplacée chaque mois.
4. La nouvelle enquête utilisera la version 1970 du manuel "Classification des activités économiques".
5. La nouvelle enquête utilisera la version 1981 du manuel "Classification géographique type".
6. La nouvelle enquête fournira des statistiques sur la rémunération pour heures supplémentaires et le nombre d'heures supplémentaires mais ne donnera plus de statistiques sur l'emploi selon le sexe.

7. As explained above, the categories of employees will be according to the methods of payment rather than the type of occupation.

8. The new survey will continue to provide an actual number of employees, but will eliminate the "employment index" relative measure.

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and the "3-digit" industry levels for Canada; the reliability of the estimates will decrease at more disaggregated industrial or geographical levels.

For further details, please contact Labour Division at (613) 992-3868.

7. Comme on l'a déjà mentionné, les salariés seront groupés selon leur mode de paiement plutôt que par leur genre d'occupation.

8. La nouvelle enquête continuera de fournir le nombre réel de salariés mais abandonnera la mesure relative de "l'indice de l'emploi".

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et aux niveaux industriels à trois chiffres pour le Canada; la fiabilité des estimations diminuera à des niveaux industriels et géographiques plus détaillés.

Pour de plus amples informations, contacter la Division du travail au numéro (613) 992-3868.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistical, construction methods and component details, see monthly report "Consumer Price Index" Catalogue 62-001. 3. The data in this table relates to average weekly wages of hourly rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Note: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Indice des prix à la consommation" no 62-001 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un

TABLEAU 15. Heures hebdomadaires moyennes désaisonnalisées et non désaisonnalisées des ouvriers
(heures déclarées), certaines séries, Canada - fin

Non-metals, except fuels - Autres que de métaux, sauf les combustibles:

unadjusted - non désaisonnalisé

[illegible]

Construction:

unadjusted - non désaisonnalisé

[illegible]

Building - Bâtiment:

unadjusted - non désaisonnalisé

[illegible]

Engineering - Génie civil:

unadjusted - non désaisonnalisé

[illegible]

Urban transit - Transports urbains:

unadjusted - non désaisonnalisé

[illegible]

Highway and bridge maintenance - Entretien des routes et ponts:

unadjusted - non désaisonnalisé

[illegible]

Hotels, restaurants and taverns - Hotels, restaurants et tavernes:

unadjusted - non désaisonnalisé

[illegible]

Laundries, cleaners and pressers - Blanchissage, nettoyage et pressage:

unadjusted - non désaisonnalisé

[illegible]

Données sur les grandes entreprises

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communications et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires— moyennes et rémunération horaire moyenne des ouvriers (heures— déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

D. 1977

On a révisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'exemplaire de septembre 1977 du numéro 72-002 au catalogue.

E. 1978

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées

in "Employment, Earnings and Hours, January — April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

F.1980

January 1980 data in Construction and Industrial Composite were revised for New Brunswick, Atlantic Region, Quebec and Canada. The revisions were published in the April 1980 issue of Catalogue 72-002.

May to September 1980 data in Transportation, communication and other utilities, Transportation, Water transport and services and Industrial Composite were revised for Ontario and Canada. The revisions were published in the December 1980 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

F.1980

Les données du mois de janvier 1980 pour le secteur de la construction ainsi que pour l'ensemble des industries, ont été rectifiées pour les provinces du Nouveau Brunswick et du Québec, de la région de l'Atlantique et du Canada. Ces données apparaissent dans l'exemplaire du mois d'avril 1980 du numéro 72-002 au catalogue.

Les données pour les mois de mai à septembre 1980 pour le Transport communication et autres services publics, transports, transports par eau et services et l'ensemble des industries ont été rectifiées pour la province de l'Ontario et le Canada. Ces données apparaissent dans l'exemplaire du mois de décembre 1980 du numéro 72-002 au catalogue.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Objectives

The Monthly Employment, Payrolls and Manhours survey is designed to measure the month-to-month trends of employment, paid hours and earnings for the commercial sector of the economy with the exclusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employment and as weekly averages for earnings and hours paid. The data are compiled and published at detailed industrial and geographic levels.

Source of Data

The statistics contained in this report are based on information obtained through a mail census of "larger firms".

The firm is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but in some cases the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

A firm is considered as "larger" when it employs 20 or more persons in any one month of the year. Although the intent of the survey is to cover all such firms, it also includes some firms with less than 20 employees and excludes some firms with more than 20 employees; the reason is that, in practice, it is not always possible to capture promptly enough employment fluctuations in individual firms.

Universe

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

Coverage

All commercial industries are covered by the survey, with the exception of agriculture, fishing and trapping; by definition such non-commercial sectors as education and related services, health and welfare services, religious organizations, private households and public administration and defense are excluded. Because the survey is limited to "larger firms", the proportion of total employment covered by the survey varies among industries, provinces and urban areas. The following table shows annual employment as compiled in the survey as a percentage of the estimated total number of employees, the latter being estimated by adding together data from the Employment, Payrolls and Manhours survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of the total number of employees are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations du nombre de salariés par province et par industrie" numéro 72-008 au catalogue.

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "gross value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques, on définit l'établissement, qui consiste habituellement en une usine, une mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this report is based on the Standard Industrial Classification for 1960. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual".

- (a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).
- (b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).
- (c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).
- (d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).
- (e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).
- (f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).
- (g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The metropolitan and urban areas selected for the survey were determined from the 1966 Census of Population. The delimitation of the nineteen "Metropolitan Areas" were subsequently adjusted to the 1971 and 1976 Censuses of Population's definitions; the definitions used for other urban areas are based on a labour market concept. The urban areas usually consist of the urban centre as well as the surrounding territory. A list showing the territory included in

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel de la classification type des industries," no 12-501 au catalogue.

- a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)
- b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).
- c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).
- d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).
- e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).
- f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).
- g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. Les régions métropolitaines et les régions urbaines sélectionnées pour cette enquête ont été déterminées à partir du recensement de 1966 de la population. Les limites des 19 "régions métropolitaines" ont par la suite été modifiées en fonction des définitions utilisées aux fins des recensements de la population de 1971 et 1976; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché

each tabulated urban area is available from the Employment and Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to strikes, unpaid holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to reflect the situation of the last seven days of the month.

2. Employee

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee paid for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) Wage-earners

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be

du travail. Une région urbaine se compose habituellement d'un centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer une liste indiquant le territoire compris dans chaque région urbaine figurant dans les tableaux en vous adressant à la Section des statistiques de l'emploi et de la rémunération. Les chiffres des unités déclarantes situées ailleurs que dans une région urbaine indiquée dans les tableaux ou non attribuées à un comté dont le nom figure sur la liste font partie des totaux provinciaux, régionaux et nationaux.

Définitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. En pratique, étant donné que peu d'entreprises tiennent des registres de paye pour cette période précise, on leur permet de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en effectuant le calcul suivant: on divise le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une grève, d'un congé non payé ou d'autres facteurs semblables, les données déclarées ne sont pas représentatives de la période de référence, on procède aux rajustements qui s'imposent afin de traduire la situation pendant les sept derniers jours du mois.

2. Salarié

Toute personne qui est rétribuée pour ses services ou ses absences pendant la semaine de référence et pour laquelle l'employeur verse des contributions au R.P.C. ou au R.R.Q. et à la caisse d'assurance-chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels (ceux qui sont embauchés de façon temporaire ou irrégulière et qui ont travaillé au moins sept heures au cours de la période de référence). Elle comprend aussi les propriétaires, les administrateurs, les associés et les autres dirigeants d'entreprises constituées en société.

Le concept des salariés exclut les propriétaires et les partenaires d'entreprises non constituées en corporation et ceux qui possèdent un bureau pour l'exercice d'une profession, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres de corps élus ou nommés, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire.

Sont visées les personnes qui ont été payées pendant une partie de la période de référence mais qui étaient en chômage ou en grève pendant le reste de la période. Les personnes n'ayant pas touché de paye pour la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit les employés et les ouvriers:

a) Ouvriers

Cette catégorie comprend les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Toutes ces personnes sont considérées comme des ou-

wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

(b) Salaried Employees

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

3. Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

4. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

5. Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to firms covered by the survey. In order to improve the quality of data, the response rate

vriers, que leurs gains soient fondés sur des taux de rémunération mensuels, horaires ou autres. Les salaires hebdomadaires moyens sont calculés pour tous les ouvriers, mais les heures hebdomadaires moyennes et les gains horaires moyens sont calculés uniquement pour ceux dont on connaît le nombre d'heures de travail.

(b) Employés

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. Gains

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. Absence payée

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. Semaine normale de travail

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été recueillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises faisant partie de l'enquête. Afin d'améliorer la qualité des

is increased through two reminders mailed to all non-respondents one month and two months after the initial mail-out. If the two reminders do not produce a response, the Regional Operations Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are still accounted for in the employment, earnings and hours tables of this publication. The method for imputing for non-response is explained under 'Imputation' below.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computer edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units similar with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the same unit of the previous month and/or for the imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, or when only partial response is received, the record is signaled by the computer edit for inspection and subject to correction or acceptance as appropriate.

Imputation

Every month, there are reporting units for which no response is received. For those newly introduced into the survey, data are manually imputed based on other sources of information such as the employment intention of the firm and the characteristics of firms in the same industry and geographic area.

Imputation for reporting units, for which data for the previous month are available, is based on the monthly changes reported by responding units within the same imputation group. A ratio of monthly change for each characteristic is applied to the previous month's data of each non respondent.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manpower survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units. The problems associated in identifying in-scope reporting units in a timely fashion, incorrect responses supplied by respondents and errors in coding and processing data. Non-sampling errors are difficult to measure and no estimate of this type of error has been obtained for this survey. However, every attempt has been made to minimize

données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi initial du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. La méthode d'imputation pour les entreprises non répondantes est expliquée ci-dessous sous la rubrique "Imputation".

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiées par ordinateur, les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante du mois précédent pour la même unité déclarante et/ou pour le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, ou lorsqu'on ne reçoit qu'une réponse partielle, l'unité déclarante est signalée lors de la vérification par ordinateur pour inspection et est sujette à être corrigée ou acceptée selon le cas.

2. Imputation

Chaque mois il existe certaines unités déclarantes dont on ne reçoit aucune réponse. Pour ces unités qui sont nouvellement introduites dans l'enquête, les données sont imputées manuellement et sont basées sur d'autres sources d'information telles que l'intention d'emploi de la firme et les caractéristiques des entreprises qui font partie de la même branche d'activité et qui sont situées dans le même lieu géographique.

L'imputation des unités déclarantes dont les données du mois précédent sont disponibles, est basée sur les changements mensuels rapportés par les unités déclarantes faisant partie du même groupe d'imputation. Un rapport du changement mensuel pour chaque caractéristique est appliqué aux données du mois précédent pour chaque entreprise non répondante.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités faisant partie de l'enquête, les problèmes associés avec l'identification de toutes les unités qui devraient faire partie de l'enquête et ce dans le plus bref délai, les renseignements inexacts fournis par les entreprises répondantes et les erreurs de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas établi d'estimation de ce genre d'erreur pour

non-sampling errors by the use of a carefully designed and carefully worded questionnaire, the relative simplicity of the data requested, follow-up of non-respondents, thorough editing of data and control of the processing operations.

Statistical Presentation

1. Data Revision

Each month, statistics for the three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current month and third estimates for the month prior to that. For both of these estimates which are based on a higher rate of response (approximately 75% and 82% respectively), full details are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate large changes. The section, "Sources for Historical Data on Employment, Earnings and Hours", lists the issues that contain the revisions received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

2. Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

The technique used assumed that the change was applicable to the base period. When this assumption is incorrect, a bias is introduced in the long term trends.

3. Averages

Average weekly earnings for all employees are obtained by dividing the total weekly payrolls by the total number of employees. Average weekly earnings for salaried employees are obtained by dividing the total weekly salaries by the total number of salaried employees. Average weekly earnings for all wage-earners are obtained by dividing the total weekly wages by the total number of wage-earners.

Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. The average weekly hours figure is obtained

cette enquête. Toutefois, tous les efforts ont été faits pour minimiser les erreurs d'observation grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. La présente publication contient tous les détails, pour ces deux dernières estimations qui sont basées sur un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes).

Une fois terminées les troisièmes estimations, on modifie à l'occasion les données à la lumière de révisions importantes. La partie intitulée "Sources des données chronologiques sur l'emploi, les gains et la durée du travail" énumère les publications contenant les révisions.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

Cette procédure, suppose que le changement, s'appliquait aussi à l'année de base, lorsque cette hypothèse s'avère fautive, un biais se crée dans les tendances à long-terme.

3. Moyennes

On obtient les rémunérations hebdomadaires moyennes en divisant les rémunérations hebdomadaires totales par le nombre total de salariés. On obtient les rémunérations hebdomadaires moyennes pour les employés à salaire en divisant le total des salaires hebdomadaires par le nombre total d'employés à salaire. On obtient les rémunérations hebdomadaires pour les ouvriers en divisant le total des rémunérations hebdomadaires des ouvriers par le nombre total des ouvriers.

On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures par semaine. On calcule les heures hebdomadaires

by dividing total weekly man-hours by the number of wage-earners who were paid for those hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series, January 1961 - December 1977" (Catalogue 72-206).

Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont été payés pour ces heures. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du U.S. *Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 décembre 1977*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

Catégorie

Mensuel

- 72-002 Emploi, gains et durée du travail. Bil.
- 72-005 Estimations du revenu du travail. Bil.
- 72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Annuel

- 72-206 Emploi, rémunérations et heures séries désaisonnalisées. Bil.

Hors série

- 72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967. Bil.
- 72-508 Estimations du nombre d'employés par province et industrie, 1961 - 1968. Bil.
- 72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968. Bil.
- 72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969. Bil.
- 72-513 Estimations du nombre d'employés par province et par industrie, 1961 - 1972. Bil.
- 72-514 Estimations du nombre d'employés par province et par industrie, 1961 - 1974. Bil.
- 72-516 Estimations du nombre de salariés par province et par industrie, 1961 - 1976. Bil.
- 72-517 Emploi, gains et durée du travail, 1978. Bil.

Annuel/divers

- 2-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970. Bil.
- 2-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972. Bil.
- 2-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973. Bil.
- 2-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970. Bil.
- 2-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970. Bil.
- 2-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971. Bil.
- 2-613 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972. Bil.
- 2-615 Coûts de la main-d'oeuvre au Canada: Commerce, 1972. Bil.
- 2-616 Coûts de la main-d'oeuvre au Canada: Enseignement, bibliothèques et musées, 1974. Bil.
- 2-617 Coûts de la main-d'oeuvre au Canada: Services fournis aux entreprises, 1975. Bil.
- 2-618 Coûts de la main-d'oeuvre au Canada: Ensemble des industries, 1976. Bil.
- 2-619 Rémunération des salariés au Canada: Ensemble des industries, 1978. Bil.

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, Ottawa (Canada), K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

Catalogue

Monthly

- 72-002 Employment, Earnings and Hours. Bil.
- 72-005 Estimates of Labour Income. Bil.
- 72-008 Estimates of Employees by Province and Industry. Bil.

Annual

- 72-206 Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

Occasional

- 72-506 Labour Costs in Manufacturing, 1967. Bil.
- 72-508 Estimates of Employees by Province and Industry, 1961-1968. Bil.
- 72-510 Labour Costs in Manufacturing, 1968. Bil.
- 72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969. Bil.
- 72-513 Estimates of Employees by Province and Industry, 1961-1972. Bil.
- 72-514 Estimates of Employees by Province and Industry, 1961-1974. Bil.
- 72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.
- 72-517 Employment, Earnings and Hours, 1978. Bil.

Annual/Various

- 72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.
- 72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.
- 72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.
- 72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.
- 72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.
- 72-612 Labour Costs in Canada: Manufacturing, 1971. Bil.
- 72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.
- 72-615 Labour Costs in Canada: Trade, 1972. Bil.
- 72-616 Labour Costs in Canada: Education, Libraries and Museums, 1974. Bil.
- 72-617 Labour Costs in Canada: Services to Business Management, 1975. Bil.
- 72-618 Labour Costs in Canada: All Industries, 1976. Bil.
- 72-619 Employee Compensation in Canada: All Industries, 1978. Bil.

In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 992-5613) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zénith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

1. In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTES

1. On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

March 1983 Data

Employment

Seasonally adjusted, final data for March 1983 decreased by 0.5% at the national industrial composite level(1). With the exception of trade, decreases were registered in all industry divisions. Decreases were also registered in all regions.

Earnings and Hours

Seasonally adjusted, average weekly earnings increased by 0.9% at the national industrial composite level. Increases were registered in all industry divisions except forestry which decreased. With the exception of the Atlantic region, all regions increased.

Unadjusted, average weekly earnings increased by 0.8% from \$407.55 to \$410.85 at the national industrial level. Average hourly earnings increased by 20 cents in mining (including milling) to \$14.48 and by 13 cents in manufacturing to \$10.83 but decreased by 1 cent in construction to \$15.95. Average weekly hours increased in mining (including milling) and in manufacturing but decreased in construction.

- (1) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence.

OBSERVATIONS

Données pour mars 1983

Emploi

Après désaisonnalisation, les données pour mars 1983 ont diminué de 0.5% pour l'ensemble des industries(1) au Canada. Toutes les divisions de l'activité économique ont diminué à l'exception du commerce qui a augmenté. Toutes les régions ont enregistré des baisses.

Gains et Heures

Les gains hebdomadaires moyens désaisonnalisés, ont augmenté de 0.9% pour l'ensemble des industries au Canada. Toutes les divisions, de l'activité économique ont augmenté sauf le forestage qui a diminué. Exception faite de la région de l'Atlantique, toutes les régions ont augmenté.

Les gains hebdomadaires moyens, non désaisonnalisés ont augmenté de 0.8% passant de \$407.55 à \$410.85 pour l'ensemble des industries au Canada. Les gains horaires moyens ont augmenté de 20 cents dans les mines (y compris le broyage), soit à \$14.48, et de 13 cents dans les manufactures, soit à \$10.83 mais ont diminué de 1 cent dans la construction, soit à \$15.95. Le nombre moyen d'heures hebdomadaires a augmenté dans les mines (y compris le broyage) et dans les manufactures mais a diminué dans la construction.

- (1) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense.

NOTE TO USERS

Changes in the Estimates of Employment, Earnings and Hours

The estimates contained in this publication are obtained from the monthly survey of Employment, Payrolls and Manhours which is under-going a major revision. The new survey is scheduled to replace the existing survey for the April 1983 survey reference month; it has, however, been conducted on a "concurrent" basis since the reference month of March 1982.

The concurrent run is conducted to tune the new automated system, to streamline the processing procedures, to evaluate the quality of the new estimates and to provide means of linking the new to the old estimates (at least for some of the highly aggregated series).

A concurrent (rather than parallel) mode was selected because of Statistics Canada's decision to send only one questionnaire to firms selected for both surveys. As part of the phase-in of the survey, the new questionnaire was sent, for the March 1982 reference month, to one portion of the firms selected for this survey, while the other portion (the firms in the Employment, Payrolls and Manhours survey) was asked to report on the new questionnaire commencing with the reference month of September 1982.

The September 1982 estimates have been affected by the implementation of the new questionnaire which groups the employees in a different manner than the old questionnaire (i.e. the employees are now grouped on the basis of their method of payment rather than on their type of occupation). Henceforth, the proportion of salaried employees to wage-earners has been altered and, consequently, the monthly trends (i.e. changes from August to September) in average weekly earnings, average weekly hours and average hourly earnings estimates for some industries were affected; the monthly trends from September 1982 to March 1983, however, will not be affected by this factor. Unfortunately, the impact of the introduction of the new questionnaire for the September 1982 estimates cannot be quantified.

The major amendments which will be introduced with the new survey for the April 1983 reference month are as follows:

1. The new survey will include firms of all sizes rather than only those with 20 or more employees.
2. The new survey will have a larger industrial coverage than the current survey; education, health and welfare services, and public administration will be added.
3. The new survey will use a mixture of census and sampling methodologies; a part of the sample will rotate each month.
4. The new survey will be based on the 1970 version of the Standard Industrial Classification.
5. The new survey will use the 1981 version for the Standard Geographical Classification.
6. The new survey will produce statistics on overtime earnings and hours, but will eliminate those on employment by sex.

NOTE AUX UTILISATEURS

Changements dans les estimations de l'emploi, des gains et de la durée du travail

Les estimations qui apparaissent dans cette publication proviennent de l'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes qui subit présentement une révision majeure. Une nouvelle enquête devrait remplacer définitivement la présente enquête au mois de référence avril 1983; en fait, les deux enquêtes sont conduites simultanément depuis mars 1982.

La production simultanée a pour but de parfaire le nouveau système automatisé, d'y agencer les opérations de traitement, d'évaluer la qualité des nouvelles estimations et d'établir des liens entre les nouvelles et les anciennes estimations (au moins pour certaines séries de niveaux très agrégés).

On a choisi la production simultanée (plutôt que parallèle) en raison de la décision de Statistique Canada de n'envoyer qu'un seul questionnaire à une compagnie (établissement et organisme) choisie par les deux enquêtes. L'une des premières étapes de l'enquête a été d'envoyer le nouveau questionnaire, pour le mois de référence mars 1982, à une partie des compagnies choisies dans la nouvelle enquête. L'autre portion (les compagnies faisant partie de l'enquête sur l'emploi, la rémunération et les heures-hommes) a commencé à utiliser ce nouveau questionnaire au mois de référence septembre 1982.

Les estimations de septembre 1982 ont été affectées par l'utilisation du nouveau questionnaire (qui regroupe les salariés d'une façon différente de l'ancien questionnaire). Avec le nouveau questionnaire, les salariés sont maintenant groupés selon leur mode de paiement plutôt que par leur genre d'occupation. Ainsi la proportion de employés par rapport aux ouvriers a été affectée et, par conséquent, les tendances mensuelles (i.e. les variations d'août à septembre) de gains hebdomadaires moyens, des heures hebdomadaires moyennes et des gains horaires moyens ont subi des changements dans certaines industries; les tendances mensuelles à partir de septembre 1982 mars 1983 ne seront pas affectées par ce facteur. On ne peut malheureusement pas quantifier l'impact de l'implantation du nouveau questionnaire sur les estimations de septembre 1982.

Les principaux changements qu'entraînera la nouvelle enquête au mois de référence avril 1983 sont les suivants:

1. La nouvelle enquête regroupe des compagnies, établissements et organismes de toutes tailles et ne se restreint plus à celles possédant plus que de 20 salariés.
2. La nouvelle enquête couvrira plus d'industries que l'enquête courante; l'éducation, la santé et les œuvres sociales, et l'administration publique seront ajoutées.
3. La nouvelle enquête utilisera un mélange de recensement et d'échantillonnage; une partie de l'échantillon sera remplacée chaque mois.
4. La nouvelle enquête utilisera la version 1970 du manuel "Classification des activités économiques".
5. La nouvelle enquête utilisera la version 1981 du manuel "Classification géographique type".
6. La nouvelle enquête fournira des statistiques sur la rémunération pour heures supplémentaires et le nombre d'heures supplémentaires mais ne donnera plus de statistiques sur l'emploi selon le sexe.

7. As explained above, the categories of employees will be according to the methods of payment rather than the type of occupation.
8. The new survey will continue to provide an actual number of employees, but will eliminate the "employment index" relative measure.

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and the "3-digit" industry levels for Canada; the reliability of the estimates will decrease at more disaggregated industrial or geographical levels.

For further details, please contact Labour Division at (613) 992-3868.

7. Comme on l'a déjà mentionné, les salariés seront groupés selon leur mode de paiement plutôt que par leur genre d'occupation.
8. La nouvelle enquête continuera de fournir le nombre réel de salariés mais abandonnera la mesure relative de "l'indice de l'emploi".

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et aux niveaux industriels à trois chiffres pour le Canada; la fiabilité des estimations diminuera à des niveaux industriels et géographiques plus détaillés.

Pour de plus amples informations, contacter la Division du travail au numéro (613) 992-3868.

Mines, y compris le broyage.....	050-099
Manufactures.....	100-399
Biens durables.....	DURABLE
Biens non durables.....	NON DUR
Aliments et boissons.....	100-147
Aliments.....	100-139
Produits laitiers.....	105-107
Pétrole, charbon et leurs dérivés.....	360-369
Construction.....	400-421
Bâtiment.....	404-421
Entrepreneurs généraux.....	404
Génie civil.....	406-409
Transp., communic. & autres services publics.....	500-579
Transports.....	500-519
Transports ferroviaires.....	506
Entretien des routes et ponts.....	516
Entreposage.....	524-527
Communications.....	543-548
Commerce.....	600-699
Commerce de gros.....	600-629
Commerce de détail.....	630-699

Les facteurs importants qui ont contribué à des modifications notables des données par rapport à celles du mois précédent sont indiqués au début de la présente publication.

Les concepts et méthodes sont décrits à la fin de la présente publication.

TABLE 3. EMPLOYMENT, EARNINGS AND HOURS, BY INDUSTRY, FOR PROVINCES AND REGIONS

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report of "Consumer Price Index" Catalogue 62-001. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this industry-area cell. - Note: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du madaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix de la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Indice des prix à la consommation" no 62-001 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

**SOURCES FOR HISTORICAL DATA ON EMPLOYMENT,
EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)**

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Ontario: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. Catalogue 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners 1961-1967

**SOURCES DES DONNÉES CHRONOLOGIQUES SUR L'EMPLOI,
(LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)**

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967*; Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973. Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires — moyennes et rémunération horaire moyenne des ouvriers (heures — déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

D. 1977

On a révisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'exemplaire de septembre 1977 du numéro 72-002 au catalogue.

E. 1978

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées

in "Employment, Earnings and Hours, January — April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

F.1980

January 1980 data in Construction and Industrial Composite were revised for New Brunswick, Atlantic Region, Quebec and Canada. The revisions were published in the April 1980 issue of Catalogue 72-002.

May to September 1980 data in Transportation, communication and other utilities, Transportation, Water transport and services and Industrial Composite were revised for Ontario and Canada. The revisions were published in the December 1980 issue of Catalogue 72-002.

) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

F.1980

Les données du mois de janvier 1980 pour le secteur de la construction ainsi que pour l'ensemble des industries, ont été rectifiées pour les provinces du Nouveau Brunswick et du Québec, de la région de l'Atlantique et du Canada. Ces données apparaissent dans l'exemplaire du mois d'avril 1980 du numéro 72-002 au catalogue.

Les données pour les mois de mai à septembre 1980 pour le Transport communication et autres services publics, transports, transports par eau et services et l'ensemble des industries ont été rectifiées pour la province de l'Ontario et le Canada. Ces données apparaissent dans l'exemplaire du mois de décembre 1980 du numéro 72-002 au catalogue.

- (1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Objectives

The Monthly Employment, Payrolls and Manhours survey is designed to measure the month-to-month trends of employment, paid hours and earnings for the commercial sector of the economy with the exclusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employment and as weekly averages for earnings and hours paid. The data are compiled and published at detailed industrial and geographic levels.

Source of Data

The statistics contained in this report are based on information obtained through a mail census of "larger firms".

The firm is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but in some cases the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

A firm is considered as "larger" when it employs 20 or more persons in any one month of the year. Although the intent of the survey is to cover all such firms, it also includes some firms with less than 20 employees and excludes some firms with more than 20 employees; the reason is that, in practice, it is not always possible to capture promptly enough employment fluctuations in individual firms.

Universe

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

Coverage

All commercial industries are covered by the survey, with the exception of agriculture, fishing and trapping; by definition such non-commercial sectors as education and related services, health and welfare services, religious organizations, private households and public administration and defense are excluded. Because the survey is limited to "larger firms", the proportion of total employment covered by the survey varies among industries, provinces and urban areas. The following table shows annual employment as compiled in the survey as a percentage of the estimated total number of employees, the latter being estimated by adding together data from the Employment, Payrolls and Manhours survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of the total number of employees are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariées et n'englobe pas toutes les entreprises comptant plus de 20 salariées, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central de employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; e sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations du nombre de salariés par province et par industrie" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1981 Annual Averages(1)

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is engaged in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all the basic industrial data which permit the calculation of "value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, though not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surviennent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. A des fins statistiques, on définit l'établissement, qui consiste habituellement en une usine, une mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this report is based on the Standard Industrial Classification for 1960. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual".

- (a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).
- (b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).
- (c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).
- (d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).
- (e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).
- (f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).
- (g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The metropolitan and urban areas selected for the survey were determined from the 1966 Census of Population. The delimitation of the nineteen "Metropolitan Areas" were subsequently adjusted to the 1971 and 1976 Censuses of Population's definitions; the definitions used for other urban areas are based on a labour market concept. The urban areas usually consist of the urban centre as well as the surrounding territory. A list showing the territory included in

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel de la classification type des industries," no 12-501 au catalogue.

- a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)
- b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).
- c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).
- d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).
- e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).
- f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).
- g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région de Prairies. Les régions métropolitaines et les régions urbaines sélectionnées pour cette enquête ont été déterminées à partir du recensement de 1966 de la population. Les limites des 19 "régions métropolitaines" ont par la suite été modifiées en fonction des définitions utilisées aux fins des recensements de la population de 1971 et 1976; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché

each tabulated urban area is available from the Employment and Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to strikes, unpaid holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to reflect the situation of the last seven days of the month.

Employee

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee paid for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) Wage-earners

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be

du travail. Une région urbaine se compose habituellement d'un centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer une liste indiquant le territoire compris dans chaque région urbaine figurant dans les tableaux en vous adressant à la Section des statistiques de l'emploi et de la rémunération. Les chiffres des unités déclarantes situées ailleurs que dans une région urbaine indiquée dans les tableaux ou non attribuées à un comté dont le nom figure sur la liste font partie des totaux provinciaux, régionaux et nationaux.

Définitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. En pratique, étant donné que peu d'entreprises tiennent des registres de paye pour cette période précise, on leur permet de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en effectuant le calcul suivant: on divise le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une grève, d'un congé non payé ou d'autres facteurs semblables, les données déclarées ne sont pas représentatives de la période de référence, on procède aux rajustements qui s'imposent afin de traduire la situation pendant les sept derniers jours du mois.

2. Salarié

Toute personne qui est rétribuée pour ses services ou ses absences pendant la semaine de référence et pour laquelle l'employeur verse des contributions au R.P.C. ou au R.R.Q. et à la caisse d'assurance-chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels (ceux qui sont embauchés de façon temporaire ou irrégulière et qui ont travaillé au moins sept heures au cours de la période de référence). Elle comprend aussi les propriétaires, les administrateurs, les associés et les autres dirigeants d'entreprises constituées en société.

Le concept des salariés exclut les propriétaires et les partenaires d'entreprises non constituées en corporation et ceux qui possèdent un bureau pour l'exercice d'une profession, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres de corps élus ou nommés, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire.

Sont visées les personnes qui ont été payées pendant une partie de la période de référence mais qui étaient en chômage ou en grève pendant le reste de la période. Les personnes n'ayant pas touché de paye pour la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit les employés et les ouvriers:

a) Ouvriers

Cette catégorie comprend les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Toutes ces personnes sont considérées comme des ou-

wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

3. **Earnings**

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

4. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

5. **Standard Work Week**

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to firms covered by the survey. In order to improve the quality of data, the response rate

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Methodology

Les données présentées dans cette publication ont été recueillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises faisant partie de l'enquête. Afin d'améliorer la qualité de

is increased through two reminders mailed to all non-respondents one month and two months after the initial mail-out. If the two reminders do not produce a response, the Regional Operations Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are still accounted for in the employment, earnings and hours tables of this publication. The method for imputing for non-response is explained under 'Imputation' below.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computer edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units similar with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the same unit of the previous month and/or for the imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, or when only partial response is received, the record is signaled by the computer edit for inspection and subject to correction or acceptance as appropriate.

Imputation

Every month, there are reporting units for which no response is received. For those newly introduced into the survey, data are manually imputed based on other sources of information such as the employment intention of the firm and the characteristics of firms in the same industry and geographic area.

Imputation for reporting units, for which data for the previous month are available, is based on the monthly changes reported by responding units within the same imputation group. A ratio of monthly change for each characteristic is applied to the previous month's data of each non respondent.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manpower survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units in a timely fashion, incorrect responses supplied by respondents and errors in coding and processing data. Non-sampling errors are difficult to measure and no estimate of this type of error has been obtained for this survey. However, every attempt has been made to minimize

données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi initial du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. La méthode d'imputation pour les entreprises non répondantes est expliquée ci-dessous sous la rubrique "Imputation".

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiés par ordinateur, les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante du mois précédent pour la même unité déclarante et/ou pour le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, ou lorsqu'on ne reçoit qu'une réponse partielle, l'unité déclarante est signalée lors de la vérification par ordinateur pour inspection et est sujette à être corrigée ou acceptée selon le cas.

2. Imputation

Chaque mois il existe certaines unités déclarantes dont on ne reçoit aucune réponse. Pour ces unités qui sont nouvellement introduites dans l'enquête, les données sont imputées manuellement et sont basées sur d'autres sources d'information telles que l'intention d'emploi de la firme et les caractéristiques des entreprises qui font partie de la même branche d'activité et qui sont situées dans le même lieu géographique.

L'imputation des unités déclarantes dont les données du mois précédent sont disponibles, est basée sur les changements mensuels rapportés par les unités déclarantes faisant partie du même groupe d'imputation. Un rapport du changement mensuel pour chaque caractéristique est appliqué aux données du mois précédent pour chaque entreprise non répondante.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités faisant partie de l'enquête, les problèmes associés avec l'identification de toutes les unités qui devraient faire partie de l'enquête et ce dans le plus bref délai, les renseignements inexactes fournis par les entreprises répondantes et les erreurs de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas établi d'estimation de ce genre d'erreur pour

non-sampling errors by the use of a carefully designed and carefully worded questionnaire, the relative simplicity of the data requested, follow-up of non-respondents, thorough editing of data and control of the processing operations.

Statistical Presentation

1. Data Revision

Each month, statistics for the three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current month and third estimates for the month prior to that. For both of these estimates which are based on a higher rate of response (approximately 75% and 82% respectively), full details are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate large changes. The section, "Sources for Historical Data on Employment, Earnings and Hours", lists the issues that contain the revisions received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

2. Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not affected by certain changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

The technique used assumed that the change was applicable to the base period. When this assumption is incorrect, a bias is introduced in the long term trends.

3. Averages

Average weekly earnings for all employees are obtained by dividing the total weekly payrolls by the total number of employees. Average weekly earnings for salaried employees are obtained by dividing the total weekly salaries by the total number of salaried employees. Average weekly earnings for all wage-earners are obtained by dividing the total weekly wages by the total number of wage-earners.

Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. The average weekly hours figure is obtained

cette enquête. Toutefois, tous les efforts ont été faits pour minimiser les erreurs d'observation grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. La présente publication contient tous les détails, pour ces deux dernières estimations qui sont basées sur un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes).

Une fois terminées les troisièmes estimations, on modifie à l'occasion les données à la lumière de révisions importantes. La partie intitulée "Sources des données chronologiques sur l'emploi, les gains et la durée du travail" énumère les publications contenant les révisions.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

Cette procédure, suppose que le changement, s'appliquait aussi à l'année de base, lorsque cette hypothèse s'avère fausse, un biais se crée dans les tendances à long-terme.

3. Moyennes

On obtient les rémunérations hebdomadaires moyennes en divisant les rémunérations hebdomadaires totales par le nombre total de salariés. On obtient les rémunérations hebdomadaires moyennes pour les employés à salaire en divisant le total des salaires hebdomadaires par le nombre total d'employés à salaire. On obtient les rémunérations hebdomadaires pour les ouvriers en divisant le total des rémunérations hebdomadaires des ouvriers par le nombre total des ouvriers.

On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures par semaine. On calcule les heures hebdomadaires

by dividing total weekly man-hours by the number of wage-earners who were paid for those hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series, January 1961 - December 1977" (Catalogue 72-206).

Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont été payés pour ces heures. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du U.S. *Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 décembre 1977*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.

In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

Employment, Earnings and Hours

April 1983

Emploi, gains et durée du travail

Avril 1983

IMPORTANT NOTE

This publication contains estimates produced from the revised monthly Survey of Employment, Payrolls and Hours; see the Note to Users for more information.

NOTE IMPORTANTE

Cette publication renferme les estimations provenant de l'enquête mensuelle révisée sur l'emploi, la rémunération et les heures de travail; voir la Note aux utilisateurs pour plus de détails.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 992-5613) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
 - nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

1. In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
 - néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTES

1. On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

NOTE TO USERS

Effective with the April 1983 reference month, the estimates contained in this publication replace those previously published in catalogue numbers 72-002 (Employment, Earnings and Hours) and 72-008 (Estimates of Employees by Province and Industry).

These new estimates are obtained from the revised monthly Survey of Employment, Payrolls and Hours. The major characteristics of this survey are as follows:

1. It includes firms of all sizes;
2. It covers all industries except agriculture, fishing and trapping, household services, religious organizations, and the military personnel;
3. It makes use of census and sampling methodologies with a part of the sample rotating each month;
4. It uses the 1970 version of the Standard Industrial Classification and the 1981 version of the Standard Geographical Classification;
5. It groups employees according to the method of payments (i.e. salaried employees, hourly-rated employees, other types of employees);
6. It produces statistics on overtime earnings and hours;
7. It aggregates data according to different mixtures of the units selected in the survey sample (i.e. all units, take-all units, take-some units).

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and at the "3-digit" industry level for Canada; the reliability of the estimates decreases at more disaggregated industrial or geographical levels.

More detailed information is given in "Concepts and Methods" at the end of this publication on methodology, concepts and definitions.

In order to help users in making the transition from the old to the new estimates, March 1983 data from the old surveys and from the new survey are published separately. This issue of the publication contains the estimates of the new survey. When bridging the two sets of estimates, users should consult the industrial conversion table at the end of this publication (see Annex 3).

Another special table (see Annex 2) provides estimates of the old "industrial composite" series for Canada and the provinces. These estimates will be terminated after the production of the December 1985 data.

The new estimates contained in this publication also appear in the Canadian Socio-economic Information Management System (CANSIM); the new reference matrix and series numbers are given at the end of this publication.

For further details, please contact Labour Division at (613) 992-3868.

NOTE AUX UTILISATEURS

Depuis le mois de référence avril 1983, les estimations qui apparaissent dans cette publication remplacent celles qui étaient auparavant publiées dans les catalogues 72-002 (Emploi, gains et durée du travail) et 72-008 (Estimations du nombre de salariés par province et par industrie).

Les nouvelles estimations proviennent de l'enquête mensuelle révisée sur l'emploi, la rémunération et les heures de travail. Les caractéristiques principales de cette enquête sont les suivantes:

1. Elle regroupe des compagnies, établissements et organismes de toutes tailles;
2. Elle couvre toutes les industries sauf l'agriculture, la pêche et le piégeage, les ménages privés, les organismes religieux et les services de la défense;
3. Elle utilise un mélange de recensement et d'échantillonnage, une partie de l'échantillon étant remplacée chaque mois;
4. Elle utilise la version 1970 du manuel "Classification des activités économiques", ainsi que la version 1981 du manuel "Classification géographique type";
5. Elle regroupe les salariés selon leur mode de paiement (i.e. employés, salariés rémunérés à l'heure, autres types de salariés);
6. Elle fournit des statistiques sur la rémunération pour heures supplémentaires et sur le nombre d'heures supplémentaires;
7. Elle rassemble les données correspondant à certains regroupements des unités choisies dans l'échantillon (i.e. ensemble des unités, unités à tirage complet, unités à tirage partiel).

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et au niveau industriel à trois chiffres pour le Canada; la fiabilité des estimations diminue à des niveaux industriels et géographiques plus détaillés.

Vous trouverez des informations plus détaillées concernant la méthodologie, les concepts et les définitions, à la fin de cette publication, sous la rubrique "Concepts et méthodes".

Afin d'aider les utilisateurs à faire la transition entre les anciennes estimations et les nouvelles, les données de mars 1983 sont publiées pour les anciennes enquêtes et pour la nouvelle. Cette publication contient les données de la nouvelle enquête. En reliant les deux ensembles d'estimations, les utilisateurs devraient référer au tableau de conversion des industries (1960 à 1970) à la fin de cette publication (annexe 3).

Un autre tableau spécial (voir annexe 2) contient les estimations des anciennes séries "ensemble des industries" pour le Canada et les provinces. Ces estimations s'achèveront avec l'apparition des données de décembre 1985.

Les nouvelles estimations qui apparaissent dans cette publication sont également disponibles par le biais du Système canadien d'information socio-économique (CANSIM); les nouveaux numéros de référence des matrices et séries CANSIM se trouvent à la fin de cette publication.

Pour de plus amples renseignements, contactez la Division du travail au numéro (613) 992-3868.

Les concepts et méthodes sont décrits à la fin de la présente publication.

CONCEPTS AND METHODS

Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled and published at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

CONCEPTS ET MÉTHODES

Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées et publiées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Engineering construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification type des industries, n° 12-501 au catalogue. Les codes C.T.I. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification type des industries:

- a) Ensemble des industries (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Génie civil (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).

- i) Public administration (909-951) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government-owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

Définitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

a) Employees paid by the hour

Any employee whose basic wage is expressed as an hourly rate.

b) Salaried Employees

Any employee whose basic remuneration is a fixed amount for a period of at least one week.

c) Other Employees

Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

d) Non-teaching Staff

All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

e) Teaching Staff

Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporations.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporations et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

a) Salariés rémunérés à l'heure

Tout salarié dont la rémunération de base est calculée selon un taux horaire.

b) Employés

Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

c) Autres salariés

Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

d) Personnel non enseignant

Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

e) Personnel enseignant

Toutes les personnes classées comme enseignants ou chargés de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'elles enseignent le jour ou le soir, les suppléants ou remplaçants sont exclus.

f) Supply or Substitute Teachers

Teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

3. Earnings

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

a) Gross Pay

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week.

b) Overtime Pay

All pay received for the number of hours worked in excess of the standard workday or workweek.

4. Hours

a) Total hours paid

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

b) Overtime Hours

The total hours for which overtime was paid. These represent the hours worked.

5. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

f) Suppléants ou remplaçants

Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

3. Gains

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

a) Rémunération brute

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps et la rémunération des absences payées dans la semaine de référence de l'enquête.

b) Rémunération du surtemps

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

4. Heures

a) Nombre total d'heures payées

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

b) Heures de surtemps

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

5. Absence payée

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

6. Standard Workweek

The standard workweek represents the number of hours of work normally scheduled for the majority of full-time employees.

7. Take-all and Take-some Units

Take-all units are those reporting units which are included in the survey sample with certainty every month. These include:

- a) All units having 200 or more employees;
- b) All units of "firms" with more than one reporting unit;
- c) Units which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units.

Take-some units are all the other units in the universe which have a known probability of selection.

Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

6. Semaine normale de travail

La semaine normale de travail représente le nombre d'heures ouvrables normalement prévues pour la majorité des salariés à temps plein.

7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les unités de 200 salariés ou plus;
- b) toutes les unités des "entreprises" possédant plus d'une unité déclarante;
- c) les unités qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités préalablement choisies.

Les unités à tirage partiel sont toutes les autres unités qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que les toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en catégorie à **tirage complet** et en catégorie à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Again, in some small cells, units may have to stay a little longer than 12 months.

Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'échantillon de l'emploi estimatif total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule étant l'ensemble des unités comprises à l'intérieur des industries à trois chiffres, de la province et du groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Par ailleurs, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-

Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, nous pourrions déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, nous leur imputons des données. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, con-

provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

Sampling errors occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

Non-sampling errors are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

sidérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement amples" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. À noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et leurs symboles correspondants sont précisés dans le tableau suivant.

ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	25.0

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator B, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

Statistical Presentation

1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèreraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est B, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

Présentation statistique

1. Révision des données

Chaque mois, nous dressons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui

most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

2. Diffusion des données

Dès que les estimations requises sont établies, des statistiques choisies à un niveau agrégatif élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin-ci plus tard.

3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du surtemps, on divise les rémunérations hebdomadaires du surtemps par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au surtemps, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires du surtemps par le nombre d'heures hebdomadaires de surtemps déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris le surtemps) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

6. CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

a) Determine the type of tabulated information needed; this will define the value of "x" for the CANSIM series number (see Table II):

- i) Aggregation of all survey units has the value 1,
- ii) Aggregation of take-all units has the value 2 and
- iii) Aggregation of take-some units has the value 3.

b) Determine the type of survey estimates required; this will provide the value of "y" for the

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

La moyenne des rémunérations hebdomadaires (surtemps exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du surtemps, par le nombre de salariés. Nous calculons cette estimation à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordinaire dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), L'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

a) Déterminer le type désiré de totalisation; cette opération définira la valeur de "x" pour le numéro de série CANSIM (voir tableau II):

- i) ensemble des unités de l'enquête: vaut 1,
- ii) unités à tirage complet: vaut 2 et
- iii) unités à tirage partiel: vaut 3.

b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro

CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number table to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings" of "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 995-7406 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 995-7406 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

7. Confidentialité

Nous avons vérifié les données du présent bulletin afin de nous assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le surtemps) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le surtemps) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le surtemps) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le surtemps) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

A. EMPLOYEES PAID BY THE HOUR —
SALARIES RÉMUNÉRÉS À L'HEURE

If you did not have any employees paid by the hour, go to Section B.
Si vous n'avez pas de salariés rémunérés à l'heure, passez à la section B.

1 Beginning and end dates of the last pay period(s) — Dates du premier et dernier jour de la ou des dernières périodes de paye

2 Number of employees paid by the hour —
Nombre de salariés rémunérés à l'heure

3 (a) Regular gross pay: Exclude irregular payments — Rémunération régulière brute: Ne comptez pas les paiements irréguliers

(b) Overtime pay included in 3(a) —
Rémunération pour heures supplémentaires incluse en 3(a)

4 (a) Total number of hours paid including overtime hours — Nombre total d'heures payées, y compris les heures supplémentaires

(b) Number of overtime hours included in 4(a) —
Nombre d'heures supplémentaires incluses en 4(a)

B. SALARIED EMPLOYEES —
EMPLOYÉS

If you did not have any salaried employees, go to Section C.
Si vous n'avez pas d'employés, passez à la section C.

5 Beginning and end dates of the last pay period(s) — Dates du premier et dernier jour de la ou des dernières périodes de paye

6 Number of salaried employees —
Nombre d'employés

7 (a) Regular gross pay: Exclude irregular payments — Rémunération régulière brute: Ne comptez pas les paiements irréguliers

(b) Overtime pay included in 7(a) —
Rémunération pour heures supplémentaires incluse en 7(a)

8 Number of hours in the standard workweek
See instructions (Convert fractions to two decimals) — Nombre d'heures dans la semaine normale de travail. Consultez les instructions (Exprimez les fractions par deux décimales)

C. OTHER EMPLOYEES (commission agents, piece-workers, etc.) —
AUTRES SALARIÉS (agents à la commission, ouvriers à la pièce, etc.)

If you did not have any other employees, go to Part II.
Si vous n'avez pas d'autres salariés, passez à la partie II.

9 Beginning and end dates of the last pay period(s) — Dates du premier et dernier jour de la ou des dernières périodes de paye

10 Number of other employees —
Nombre d'autres salariés

11 Regular gross pay —
Rémunération régulière brute

11. INFORMATION FOR THE ENTIRE MONTH — RENSEIGNEMENTS SUR LE MOIS ENTIER

12. Irregular payments made at any time during the month: Include payments such as retroactive payments, commission settlements, pay in lieu of notice, etc. — Paiements irréguliers versés à un moment quelconque au cours du mois: Comptez les paiements tels que les paiements rétroactifs, les versements de commissions, les indemnités de préavis, etc.

(If not applicable go to question 13 — Si sans objet, passez à la question 13.)

Type of payment (please specify below) <i>Genre de paiement (veuillez préciser ci-dessous)</i>	Period covered <i>Période visée</i>						Amount paid — Montant versé			Office use only <i>Réserve au bureau</i>				
	From - Du			To - Au			To employees paid by the hour <i>Aux salariés rémunérés à l'heure</i>	To salaried employees <i>Aux employés</i>	To other employees <i>Aux autres salariés</i>

ANNEX 2

“INDUSTRIAL COMPOSITE” ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled “Industrial Composite”. This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term “Industrial Composite” has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

ANNEXE 2

ESTIMATIONS DE L’“ENSEMBLE DES INDUSTRIES”

Avant avril 1983, nous produisions des données sur l’emploi, la rémunération et les heures pour un regroupement appelé “ensemble des industries”. Ce regroupement couvrait tous les secteurs de l’industrie sauf l’agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l’emploi et la rémunération hebdomadaire moyenne pour ce regroupement n’ont jamais constitué des mesures globales.

Avec les débuts de l’Enquête sur l’emploi, la rémunération et les heures de travail (EERH), le regroupement “ensemble des industries” n’a plus de raison d’être. L’enquête EERH couvre beaucoup plus de secteurs que l’enquête qu’elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l’économie, tant par industrie que par taille d’employeur. Nous avons donc décidé de ne pas publier l’“ensemble des industries” dans le cadre de l’enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme “ensemble des industries” soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s’accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l’“ensemble des industries”, calculées à partir des données de l’EERH.

Il ne faut pas oublier qu’il s’agit d’approximation. En effet, il est impossible de reproduire exactement l’“ensemble des industries” à cause des changements touchant la couverture de l’enquête, les règles de l’enquête, la formulation des questions et d’autres facteurs accompagnant la révision de l’enquête en avril 1983. Cependant, des recherches ont montré qu’il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu’au mois d’enquête: décembre 1985.

Estimates of Average Weekly Earnings for 'Industrial Composite',
Canada and Provinces

Estimations de la rémunération hebdomadaire moyenne pour l'ensemble des industries',
Canada et Provinces

	Average Weekly Earnings - Rémunération Hebdomadaire Moyenne
	April 1983 Avril
CANADA(1)	411.45
Newfoundland - Terre-Neuve	380.76
Prince Edward Island - Île-Du-Prince-Édouard	303.66

New Brunswick - Nouveau Brunswick	366.73
Quebec	404.89
Ontario	403.93
Manitoba	362.21
Saskatchewan	389.04
Alberta	458.55
British Columbia - Colombie-Britannique	475.25

(1) Includes Yukon and North West Territories - Comprend le Yukon et les Territoires du Nord-Ouest.

ANNEX 3

Industry Conversion

The Survey of Employment, Payrolls and Hours uses the 1970 version of the Standard Industrial Classification, while the previous survey used the 1960 version.

There are some 1960 industry codes which simply do not have an equivalent 1970 code. For these industries, it is not possible to have a link between the old and new data. There are other 1960 industry codes which have only a partial fit with a 1970 code. These cases need to be qualified with a quality indicator. The indicators have been defined as follows:

- A = 100% overlap (complete match)
- B = less than 100% but at least 90% overlap
- C = less than 90% but at least 75% overlap
- D = less than 75% but at least 50% overlap
- E = anything less than 50%

When the data - quality assessment is added, the letters lose these precise interpretations. It might be fair to interpret these letters as follows:

- A = excellent
- B = very good
- C = adequate
- D = marginal
- E = of no value

Note that the quality assessment used here does not include the fact that in many series, for purposes of gathering payroll and hours, a substantial number of small employers were added, the questionnaire wording and concepts were altered, and the survey procedures were changed.

ANNEXE 3

Conversion des industries

L'enquête sur l'emploi, la rémunération et les heures de travail fait usage de la version 1970 de la Classification des activités économiques, alors que les enquêtes antérieures utilisaient la version 1960.

Certains codes d'activité économique de 1960 n'existaient plus en 1970. Dans ce cas, il est impossible de lier les anciennes et les nouvelles données. D'autres codes de 1960 ne recoupent que partiellement ceux de 1970. Dans ces cas, on doit appliquer un indicateur de qualité. Ces indicateurs sont qualifiés comme suit:

- A = recouplement complet (100%)
- B = recouplement inférieur à 100% mais d'au moins 90%
- C = recouplement inférieur à 90% mais supérieur à 75%
- D = recouplement inférieur à 75% mais supérieur à 50%
- E = recouplement inférieur à 50%

Lorsque les cotes qualitatives des données sont fournies, les lettres perdent leur signification précise. Il convient de les interpréter comme suit:

- A = excellent
- B = très bien
- C = convenable
- D = médiocre
- E = sans valeur

Il convient de souligner que cette évaluation qualitative ne tient pas compte du fait que, dans plusieurs séries, un nombre important de petites entreprises ont été ajoutées dans le but de recueillir leurs données sur la rémunération et les heures; elle couvre, pas non plus les différences de formulation et de concepts dans les questionnaires, ni les différentes procédures d'enquête.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

Catalogue

Monthly

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces, (This publication is terminated with March 1983 data).

Quarterly

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

Occasional

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

Catalogue

Mensuel

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

Trimestriel

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

Hors série

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusivement. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.
